Corporate Profile

AmMetLife Takaful is a strategic partnership between AMMB Holdings Berhad (“AmBank Group”) and MetLife International Holdings LLC (“MetLife”). AmMetLife Takaful offers a comprehensive range of takaful products distributed through a combination of over 200 AmBank and AmMetLife branded branch offices, in addition to the strength of its authorised takaful agents nationwide.

The strategic partnership combines the international expertise and financial strength of MetLife with the local strength and reach of AmBank Group to create a customer-centric and modern takaful solutions provider in Malaysia.

Together with a deep and respectful knowledge of Shariah principles and values, we are focused on meeting our customers’ diverse needs with innovative solutions at different stages of their lives, making it easier and simpler for families and individuals to achieve financial security and pursue more from life.

Investment-Linked Funds Objectives

ANNUAL REPORT
2022

Investment-Linked Funds
For the Financial Year Ended 31 March 2022

Investment-Linked Funds Objectives

1. AmMetLife Takaful Equity Fund

The Fund aims to provide the certificate holder with capital growth over a medium to long-term period by investing in a portfolio of Shariah compliant securities with superior growth potential.

Returns to certificate holders will be obtained via growth in unit price of the Fund.

2. AmMetLife Takaful Sukuk Fund

The Fund aims to provide the certificate holder with an opportunity to gain higher than average income earned from Islamic fixed deposits, over a medium to long term investment horizon, mainly through investment in a diversified portfolio of Islamic fixed income securities.

Returns to certificate holders will be obtained via growth in unit price of the Fund.

3. AmMetLife Takaful Balanced Fund

To achieve moderate capital growth over a medium to long-term time period by investing in a portfolio of Shariah compliant investments.

Returns to certificate holders will be obtained via growth in unit price of the Fund.

4. AmMetLife Takaful Balanced Plus Fund

The Fund aims to provide the Certificate Holder with an opportunity to gain potentially higher than Shariah-compliant fixed deposits, over a medium to long term investment horizon, through investing in Shariah-compliant collective investment schemes (“CIS”).

Returns to certificate holders will be obtained via growth in unit price of the Fund.

Investment Market Review

AmMetLife Takaful Equity Fund, Balanced Fund, Sukuk Fund, and Balanced Plus Fund

Equity Market Review

Equity market started the period under review on a weak note as sentiments were affected by surging Covid19 cases and slow roll out of vaccines domestically, fearing further delay of domestic economy reopening with the re-imposition of lockdown. Risk appetite was also dented by concerns over rising global bond yields on higher inflation expectations, with signals from the US Federal Reserve (the Fed) that it would be prepared to raise interest rates sooner than previously. FBM Emas Shariah Index drifted to a low of 12,009.50 on 12 July 2021. However, equity markets started to recover in August 2021 on vast progress in vaccination rate and declining trend in Covid-19 cases, paving way for normalization in economic activities. Buying activities were also supported by the return of foreign investors as political instability subsided following the appointment of the new Prime Minister. Towards the end of 2021, markets turned negative again with concerns on China's slowing economic growth, surging long-term bond yields and word that the Federal Reserve may starts to unwind its support for the economy.

Equities started the year of 2022 with a sell-off in technology stocks, amid caution over the ongoing inflationary pressure and hawkish moves by the Federal Reserve. In addition, geopolitical tension between the US and Russia over Ukraine also caused more uncertainty and pushed-up crude oil and gas prices – creating more risk for inflation. Despite the rising volatility, sentiment in the local market recovered in February as investors weighed the positives coming from high commodity prices. In addition, favorable economic data which suggests Malaysia's seeing stronger recovery this year driven by economic reopening as Covid-19 moves to an endemic stage further fueled sentiment. Towards the end of period under review, profit taking emerged on worries that the lockdown in Shanghai following the resurgence of Covid-19 cases will hit global activity, worsening the supply chain issue and eventually add to inflationary pressures.

FBM Hijrah Shariah Index ended the period under review with a loss of 5.61%, to end at 12,600.91 points.

Sukuk Market Review

In 2021, pandemic uncertainties held great influence to global growth. The uneven vaccine distribution led to uneven economy recovery amongst countries, whereby developed economies lead emerging markets in terms of business cycle. By the end of 2021, the U.S. turned hawkish in the face of inflationary pressure and strong employment data. On the other hand, Malaysia's GDP has yet to recover to pre-pandemic levels, and would prefer a longer period of accommodative monetary policy. The divergence in monetary policies resulted in a volatile year for Malaysia's fixed

income market. As such, Malaysian Government Securities ("MGS") yield curve bearish flattened in similar fashion as the US Treasury yield curve. Domestically, despite a relatively benign domestic inflation and accommodative monetary policy, fiscal stimulus exerted upward pressure in yields due to increased sovereign bond supply and widening of Malaysia's fiscal deficit.

Main events in the 1st quarter of 2022 were the Russia-Ukraine war and Fed's surprise shift to a more hawkish stance. The ongoing Russia and Ukraine war has led to increasing concerns over high inflation as both countries are major commodity producers. Malaysian fixed income market largely held steady in January 2022 and February 2022 as BNM left its policy rate unchanged at 1.75% and struck a relatively dovish tone. Investors viewed the spike in oil prices and its potential impact on budget deficit, along with announcement of another RM10k EPF withdrawal in stride as investors viewed the impact to be manageable. However, the local bond market was not spared from the

March 2022 global bond rout as reflected by the spike in local government bond yields.

~by AmFunds Management Berhad

Balanced Plus Market Review

Dana Al-Ilham

Malaysian equity markets bucked the trend of the positive returns from regional markets in 2Q2021, as Covid-19 cases remain high despite the government imposing stricter lockdown measures. The government announced MCO 3.0 effective 10th May 2021, but restrictions for this lockdown was not as strict as MCO1. However by 28 May 2021, the government announced that a strict nationwide lockdown will be enforced effective 1 June 2021 (FMCO) where only essential services would be allowed to operate. PEMERKASA plus stimulus package of RM40b was then announced mid-2Q2021 following the announcement of the imposition of FMCO, of which RM5b would be via direct fiscal injection. Full MCO that started on the 1st June 2021 was extended for another 2 weeks on 28 June. Based on the National Recovery Plan, Phase1 (Full MCO) would only end if average daily cases declined below 4000 a day, ICU bed utilization was moderate, and 10% of population have been fully vaccinated. As at 30 June 2021, Malaysia's 7-day average Covid cases stood at 5853, and R-Naught was at 1.05. On the 28th June 2021, the Malaysian Government announced an RM150b economic package (PEMULIH) of which RM10b is expected to be from direct fiscal injection. During the month, political uncertainty went up a notch when the King announced that the State of Emergency would not be extended and that Parliament should reconvene as soon as possible.

Investment Market Review (Cont'd)

Malaysian equity markets started 3Q2021 focused on the Covid-19 pandemic, as Covid cases remained stubbornly high, resulting in further restrictions to the movement order, as many non-essential factories were asked to shut or operate at 10% capacity. Politics was in the limelight in July 2021 and contributed too much of the weakness in 3Q as the FBMKLCI Index declined below its psychological support of 1,500. The special parliament sitting which started 26 July 2021 and was to last until 2 August 2021, was cut short due Covid cases amongst those who attended Parliament. This followed much drama, when the emergency ordinances were revoked arbitrarily, without the King's consent and was not put to the vote of both houses of Parliament. The month of August saw the resignation of Tan Sri Muhyiddin Yassin as the Prime Minister and the appointment of Dato Seri Ismail Sabri as the 9th Prime Minister of Malaysia after securing 114 Parliamentary seats (min 111 is required to form a government). Market sentiment improved with the swearing in of the 9th Prime Minister, as opposition leaders agreed to find common ground with the new PM, and to focus on tackling the COVID outbreak and boost the economy. Malaysian equity markets ended the 3Q2021 in a slight positive region, as regional market sentiment was dragged by the sell-off in China and US markets. Investors were spooked by the series of negative developments in China and the recent spike in US bond yields. In Malaysia, investors were concerned over news of government plans to waive three months of interest for low-income borrowers, and the new windfall taxes and capital gains tax currently considered. Covid cases in Malaysia has been trending down as Klang Valley moved to Phase 2 of the National Recovery Plan on 10th Sept, and is expected to move to Phase 3 as at 1 Oct 2021. By the end of Sept 2021, 86% of Malaysia's adult population has been fully vaccinated. Foreign investors were net buyers of Malaysian equity of RM0.7b for September, the second consecutive month, but still remain net sellers YTD of RM3.8b as at end 3Q2021.

Malaysian equity markets started 4Q2021 positive as commodity prices surged during the month, which was a boon for energy and plantation stocks. Brent crude oil prices rose 7.75% in October, whilst crude palm oil (CPO) prices rose 12.15% and remained above RM5000/tonne. Malaysia allowed inter-state and international travel effective 10 Oct 2021 for fully vaccinated residents, as Malaysia reached the target of inoculating 90% of its adult population. Budget 2022 was announced on the last Friday of the month, and prior to its unveiling, construction and property stocks rallied on the back of Budget 2022 expectations. However, by November, Malaysian equity markets trended lower, as investors sentiment turned negative as details of the Budget 2022 was digested. The announcement of Cukai Makmur (prosperity tax) will have a negative impact on earnings from the

one-off corporate windfall tax, in addition to the removal of tax exemptions on foreign source income (this was subsequently deferred to 2026). Raising the Stamp Duty for share transactions by 50% and the abolishment of the stamp duty limit of RM200 effective 1 Jan 2022 could dampen trading activities in the stock market. The market sell down was also partly due to concerns over the threat of the Omicron variant of Covid-19 on global economic recovery. The other factors that may have damped market sentiment in Nov include concerns over ESG as Dyson announced that it had cut ties with ATA IMS, following an audit on its labour practices. Malaysian equity markets closed 4Q2021 higher due to year end window dressing with the FBMKLCI gaining 1.5% on the last trading day of the year. Concerns over the emergence of the Omicron variant eased as the variant, whilst seemingly more infectious, resulted in milder symptoms. However new Covid cases globally spiked post mid-December, for some exceeding previous highs in reported daily cases, resulting in governments reintroducing restrictions on social activities, with some governments opting to revert to only allowing essential businesses remain open. Nevertheless, levels of vaccination have improved significantly, Malaysia has reached 78.4% of total population fully vaccinated as at end Dec 2021, with 6.6m booster shots administered so far (almost 20% of population). Malaysia was subject to three days of torrential rain resulting in the worst floods in central Malaysia, not seen for 50 years. So far death toll from the floods is at 46, with an estimated 50k-70k people displaced as a result. The severe flooding disrupted factory production and will affect trade activity in December.

Malaysian equity markets started 2022 lower due to concerns over earnings risks, rising global interest rates and political risks. The US Federal Reserve FOMC minutes for December's meeting confirmed the end of the Fed's purchases in March 2022, and put upward pressure on interest rates. With the US Federal Reserve more hawkish, the impending rate rise will be expected to weigh on growth and hence technology stocks. Tech stocks in the US suffered its worst decline in Jan 2022 since the Covid-19 pandemic started in Mar 2020, with the NASDAQ down 8.98% (USD). Similarly in Malaysia, the KL Technology Index declined 15.32% in Jan 2022. The Ukraine-Russia crisis escalated dramatically in the 3rd week of Feb 2022 after Russia launched a full-scale military invasion of Ukraine. Brent crude oil price topped USD100/bbl for the first time since 2014 following the military strike and subsequently soared above USD130/bbl after the US and the UK announced the ban of Russian oil imports. Food related commodity prices spiked as Russia and Ukraine together account for approximately 29% of global wheat exports, while Ukraine is the fourth leading exporter of corn.

Investment Market Review (Cont'd)

Russia was the largest producer of natural gas, which are used both as feedstock and fuel for nitrogen fertilizer production. Equity markets in Malaysia were buoyed from a rally in the plantation sector benefiting from the record high CPO prices that hit highs of above RM8000/T during the 1Q2022. The 4Q21 results season reported stronger than expected earnings as corporates benefitted from higher commodity prices (CPO and crude oil) and better sales following the lifting of the interstate travel ban in Oct 2021. The Johor State elections were held on the 12 March 2022, which saw the Barisan Nasional (BN) party win two-thirds majority, capturing 40 of the 56 seats contested. UMNO contributed to 33 seats victory. Foreign investors were net buyers of equity in for the 1Q2022 of RM6.3b.

The FBM KLCI closed the period under review at 1,587.36 points, up 0.88%. The broader FBM Emas (FBMEmas) Index closed the period under review lower by 1.96%. The MSCI Asia Pacific ex-Japan Index declined by 12.73% in USD terms.¹

¹Source: Bloomberg: World indices
~by Eastspring Investments Berhad

Principal DALI Equity Growth Fund

In Q1 2021, the FTSE Bursa Malaysia Emas Shariah Index ("FBMS") rose 424.33pts or 3.30% to 13,272.50 pts in April. Gloves rallied on the back of the surge in COVID-19 cases domestically and abroad especially in India, while reopening plays took a hit. The Healthcare sector index was up 15%, followed by Industrial (+4), Transport (+4%), Tech (+3%) and Construction (+2%), while Energy were the worst performers, down 3%.

In Q2 2021, the FTSE Bursa Malaysia Emas Shariah Index ("FBMS") declined 594.63pts or -4.666% to 12,178.28 pts in June. While Gloves and Plantations were the key culprits for the decline, overall market sentiment was affected by the Malaysian government resorting to a total lockdown from 1 June to battle surging COVID-19 cases domestically. Thus, the delay of transitioning into Phase 2 of the National Recovery Plan. To recap, Phase 2, which was slated to commence 1 July, was conditional upon daily cases falling below 4,000, the public health system no longer under significant strain and 10% of the population immunized. With the exception of Financials, Transport and REITs, all the other sectors were in the red led by Healthcare, Plantations and Property.

In Q3 2021, the FTSE Bursa Malaysia Emas Shariah Index ("FBMS") declined 391.45pts or -3.07% to 12,359.01 pts in September. Investors were spooked by a surprise move by the MOF seeking local banks to waive interest payments for loans under moratorium in 4Q21 for borrowers in the B50 category, and

concerns that the government might be imposing a windfall tax levy or capital gains tax to shore up revenues to fund stimulus measures. China's Evergrande debacle and US taper tantrums may have also added to the pessimism.

In Q4 2021, the FTSE Bursa Malaysia Emas Shariah Index ("FBMS") rallied 134.48pts or +1.1 in December, and ended 2021 at 12,263.10pts which represented a decline of -6.8% for the year. Investors sighed relief as encouraging findings on the severity of the latest Covid variant were published and data pointing to a decoupling of new cases and hospitalization rates. Reopening plays and Tech dominated the leaderboard, while Glove stocks gave up some of their earlier gains.

In Q1 2022, the FTSE Bursa Malaysia Emas Shariah Index ("FBMS") declined 174pts or 1.44%. Construction was the largest gainer driven by anticipation of a revival in jobs, followed by Telcos and Financials. Tech bounced as investors acclimatized with Fed interest rate hikes, which saw its first lift-off of 25bps. Tourism plays also saw interest with the 1 April border reopening. Commodities (Plantations, Energy and Alum/Steel) corrected following the strong rally in the previous month stoked by the Russian-Ukraine.

Principal Islamic Lifetime Sukuk Fund

In Q1 2021, we witnessed Malaysia's bond markets were not spared from the global sell-off and coupled with our own domestic concerns, the MGS yield curve bear-steepened and is probably trading at one of its steepest we've seen in recent times, with term spreads trading above both its long-term and short-term averages. The long-end steepness now is still reflecting the underlying risks investing in Malaysia Ringgit Bond. For long-end term spreads to contract back to historical levels, we need to see the government to establish better stability as well as stronger discipline to improve fiscal standing. These are hurdles that can only be achieved in a post Covid recovery world (which is our base case). Lastly, fund flows may also be another catalyst to drive spreads narrower. However, if fundamental factors are not improved on a sustained manner, spreads can adjust higher again as outflow happens. Hence, govvies position in portfolio should be nimble.

In Q2 2021, the higher fiscal spending continues to be a challenge for market to absorb additional government bond supply. The main challenge that is still weighing on the local bond market sentiment is the ongoing pension withdrawal concern as the bulk of withdrawal pressure is likely to be in 2Q2021 and should anchor the bond yield steeper than regional peers. We now look forward to 3Q21 to be the window for long-end term spreads to tighten closer to long-term average with the bulk of govvies maturities

Investment Market Review (Cont'd)

cluster around July to November. The risk to our forecast is the unexpected delay in global and domestic recovery, higher funding requirement for fiscal stimulus and any potential political risks.

In Q3 2021, we were anticipating RM32.2b (MGS: RM25.2b; MGII: RM7B) of govvies maturing. As we are looking at about RM42b of new issuance, the small net issuance will see some support for the local bond market as investors will look to roll over their positions. The new i-Citra facility is expected to see withdrawals up to RM30b. However, these estimates are typically conservative and actual withdrawals could fall short as most of the vulnerable members have already exhausted their balances. We continue to see domestic liquidity looking healthy with strong BTC across all auctions. At the time of writing, we saw the 20y GII auction garnering BTC of 2.687x on an expected RM4.5b total size with total bids range being higher than the range for 20y-30y auctions YTD suggesting ample domestic liquidity. At this juncture, it remains unknown if the Government will raise the statutory debt-to-GDP ratio from 60% to 65%, as well as it plans to lower it back down. The Temporary Measures Act 2020 saw the debt limit raised from 55% to 60% and stated that the increased debt limit is until 31 December 2022. Any further increase implies a sharper fiscal consolidation or the timeframe for debt-to-GDP could be prolonged which is a negative factor for rating agencies.

In Q4 2021, the front end of the curve especially the 3-year MGS appears more favorable based on the historical averages following the continuous flattening of the sovereign yield curve. During the month, credit spreads tightened across tenor and rating segments particularly on the long end of the curve as the corporate bond yield curve bear flattened with tenor 15 year and above moving lower by 8-13bps and 7-11bps for the AAA and AA2 segments respectively. Credit spreads are below long-term averages. With the fiscal deficit target of 6% for 2022 and the sizeable maturity of MGS/MGII in 2022 totaling RM78.9 billion, we estimate the gross MGS/MGII funding for 2022 is to be around RM165 billion (2021: RM160 billion and 2020: RM148.8 billion) given the proactive management of maturities via debt switches and some flexibility in government's funding strategy.

In Q1 2022, despite rising oil prices, we are keeping our estimate for the gross MGS/MGII funding for 2022 to be around RM165 billion (2021: RM160 billion and 2020: RM148.8 billion) – as we believe the impact of the rising Brent prices will be largely neutral and manageable. Our estimate is also premised on a fiscal deficit target of 6% for 2022 and the sizeable maturity of MGS/MGII in 2022 totaling RM78.9 billion. Based on the auction calendar 2022, the 36 government bond auctions (18MGS and 18MGII) with 14 private placements are skewed more towards the 15yr-

30yr bucket (15 auctions) and likely to be more fronted loaded with 19 auctions of estimated issuance size of RM86.5billion target to be issued in 1H2022. It is noted that there will be 4 upcoming auctions in April and three of the four auctions will be the new benchmark bonds. 2Q2022 will see the highest net issuances of govvies for the year with only RM11 billion maturity in the month of April.

~by CIMB-Principal Asset Management Berhad

Amlslamic Growth Fund

Equity market started the period under review on a weak note as sentiments were affected by surging Covid cases and slow roll out of vaccines domestically, fearing further delay of domestic economy reopening with the re-imposition of lockdown. Risk appetite was also dented by concerns over rising global bond yields on higher inflation expectations, with signals from the US Federal Reserve (the Fed) that it would be prepared to raise interest rates sooner than previously. FBM Emas Shariah Index drifted to a low of 12,009.50 on 12 July 2021. However, equity markets started to recover in August 2021 on vast progress in vaccination rate and declining trend in Covid-19 cases, paving way for normalization in economic activities. Buying activities were also supported by the return of foreign investors as political instability subsided following the appointment of the new Prime Minister. Towards the end of 2021, markets turned negative again with concerns on China's slowing economic growth, surging long-term bond yields and word that the Federal Reserve may start to unwind its support for the economy.

Equities started the year of 2022 with a sell-off in technology stocks, amid caution over the ongoing inflationary pressure and hawkish moves by the Federal Reserve. In addition, geopolitical tension between the US and Russia over Ukraine also caused more uncertainty and pushed-up crude oil and gas prices – creating more risk for inflation. Despite the rising volatility, sentiment in the local market recovered in February as investors weighed the positives coming from high commodity prices. In addition, favorable economic data which suggests Malaysia's seeing stronger recovery this year driven by economic reopening as Covid-19 moves to an endemic stage further fueled sentiment. Towards the end of period under review, profit taking emerged on worries that the lockdown in Shanghai following the resurgence of COVID-19 cases will hit global activity, worsening the supply chain issue and eventually add to inflationary pressures.

FBM Emas Shariah Index ended the period under review with a loss of 7.04%, to end at 11,943.35 points.

Investment Outlook

ANNUAL REPORT
2022

Investment-Linked Funds
For the Financial Year Ended 31 March 2022

Investment Outlook

AmMetLife Takaful Equity Fund, Balanced Fund, Sukuk Fund and Balanced Plus Fund

Equity Market Outlook

Equity markets have been volatile over fears of ongoing inflation pressures and tightening central bank policies. Rising uncertainty over the economic impact as energy and commodity prices continue to stay elevated also adds to the volatility. Nevertheless, we are cautiously optimistic for the equity market on the back of economic re-opening amid an endemic Covid-19 situation, along with accommodative fiscal policies to sustain moderate economic growth. In addition, local equity market will benefit from the rally of commodity prices and its attractive valuation relative to peers.

Sukuk Market Outlook

Despite yields having risen to pre-pandemic levels, sentiments on the domestic bond market will remain bearish on Fed hawkishness and recent BNM comments on local bond supply. The yield curve will be pressured on the uncertainty and anticipation that BNM will embark on a tightening cycle following the Fed's rate hike.

With BNM's modest revision to growth and inflation forecasts for 2022, we continue to expect 1-2 rate hikes by BNM in the second half of the year. However, recent statements by the Fed alluding to more aggressive tightening may result in BNM bringing forward rate hikes to 2Q of this year. Key considerations will be upcoming economic data that would provide an indication on the resilience of the current recovery.

~by AmFunds Management Berhad

Balanced Plus Market Outlook

Dana Al-Ilham

Two months into the Russia/Ukraine conflict, a resolution towards a ceasefire has yet to be achieved. As such commodity prices are likely to remain higher for longer. Other global risks to contend with could include higher inflationary pressures resulting in the US Federal Reserve hiking rates faster and more aggressively. Nevertheless, as Malaysia moves towards endemic phase post 1 April 2022, the reopening will help support the recovery. The PM announced effective 1 May 2022 further relaxations of restrictions such as allowing the option not to wear a mask outdoors, no requirement to check-in with MySejahtera, social distancing no longer required, and fully vaccinated travelers will no longer need to do a Covid-19 test before departing Malaysia and also upon arrival, and Covid-19 insurance is no longer needed for all travelers entering Malaysia.

The success of the BN party in the recent Johor State Elections will fuel speculations that GE15 may be called after July 2022. A convincing win by any party will be a positive factor towards a more stable government and policy making. Whilst there are many potential headwinds on the horizon, any correction in the market would provide a good opportunity to accumulate fundamentally strong stocks.

~by Eastspring Investments Berhad

Principal DALI Equity Growth Fund

In Q1 2021, Malaysia's manufacturing PMI rose to a record of 53.9pts in April from 49.9pts in March, suggesting that the economy is steadily recovering from the pandemic. The last time the measure showed the economy was in expansion was in July 2020. Output also grew of the first time in nine-months, while new orders also returned to expansion. Export sales grew rose for the first time since November 2019 as demand across Asia and the US recovered. However, there was a renewed fall in employment while input cost inflation rose to its highest in over four years, according to IHS Markit. BNM is expected to maintain its OPR at 1.75% during its May policy meeting. There is expectation of a spike in inflation of 2.5-4.0% this year but we expect the central bank to maintain an accommodative monetary policy and instead resort to fiscal measures and stimulus to support the economy. To recap, Bank Negara pegged 2021 GDP growth at 6.0-7.5%.

In Q2 2021, Malaysia's manufacturing PMI fell to 39.9pts in June from 51.3pts in May, the lowest reading since April 2020. This was not completely unexpected given the stricter movement controls which dampened demand, curbed production and disrupted supply chains. IHS Markit, which publishes the monthly statistic, also indicated that business confidence had hit the lowest reading on record. Manufacturers surveyed expressed pessimism over the year-ahead outlook amid concerns about the duration of the pandemic, a stark contrast to their optimistic responses last month. Given the sustained weakness in the economy, we expect Bank Negara to maintain OPR at 1.75% in the upcoming policy meeting on 8 July, and to continue to resort to fiscal measures and stimulus, such as the recently launched RM150bn PEMULIH program. The central bank may share its latest 2021 GDP growth forecast (previously at 6.0-7.5%) in the upcoming meeting. Bloomberg's June polls are not yet released (May's poll was 5.7%), but recent forecasts have a wide range of 2.5%-6.3%.

Investment Outlook (Cont'd)

In Q3 2021, Markit also indicated that manufacturers were increasingly confident that output would rise over the coming year, citing hopes that the end of the pandemic would encourage new projects to begin and aid a broad-based recovery in market demand. It also added that the degree of optimism reached the highest since April. Bank Negara maintained the OPR at 1.75% during the MPC meeting on 9 September. The recent spike in inflation was viewed as transitory and is projected to moderate, with core inflation to range between 0.5% and 1.5% for 2021.

In Q4 2021, Malaysia's manufacturing PMI improved further from 52.3pts in November to 52.8pts in December, the third straight month of growth in factory activity and the strongest since April. Production and new order volumes expanded aided by lifting of movement restrictions and demand recovery. New export sales also expanded on stronger demand from US and China. Despite mounting pressure on production lines, manufacturers scaled down workforce. On OPR, we expect Bank Negara to hike 25bps in 2022 and 2023 each respectively from the current 1.75% but economists are turning more hawkish on the back of persistent inflationary pressures. Post-3Q21 results earnings revisions, we project 5% decline in earnings for the FBM KLCI for 2022 but 10% growth excluding the Glove sector. Banks, Gaming and Transportation account for 75% of the ex-gloves growth for 2022.

In Q1 2022, Malaysian manufacturers reported a near-stagnation of operating conditions. Headline manufacturing PMI fell from 50.9pts in February to 49.6pts – the last time the reading was below 50 was in Sept 2021. New orders and output moderated for the third month running and at faster rates. Firms attributed weakening demand conditions to rising Covid-19 cases and higher input prices, with manufacturing capacity constrained by supply shortages, more recently exacerbated by the Russia-Ukraine war. Higher input costs have also prompted businesses to raise output charges at the sharpest rate since April 2021.

Bank Negara trimmed GDP growth forecast to 5.3-6.3% for 2022, from 5.5-6.5% previously. Despite the re-opening of borders and businesses following the lifting of Covid-19 restrictions, the central bank expects some impact from the Russia-Ukraine conflict. Headline inflation is also projected to average higher between 2.2% and 3.2% (versus 2.1% previously). It maintained the OPR at 1.75% in the recent MPC meeting, but we expect a 25bps hike in 2H22, and 25bps in 2023. The monetary tightening will be dependent on the inflation print, which is now running hot on the back of surging commodity prices and persistent supply-chain issues.

Principal Islamic Lifetime Sukuk Fund

In Q1 2021, Malaysia's manufacturing PMI rose to a record of 53.9pts in April from 49.9pts in March, suggesting that the economy is steadily recovering from the pandemic. Export sales grew rose for the first time since November 2019 as demand across Asia and the US recovered. However, there was a renewed fall in employment while input cost inflation rose to its highest in over four years, according to IHS Markit. BNM is expected to maintain its OPR at 1.75% during its May policy meeting. There is expectation of a spike in inflation of 2.5-4.0% this year, but we expect the central bank to maintain an accommodative monetary policy and instead resort to fiscal measures and stimulus to support the economy. To recap, Bank Negara pegged 2021 GDP growth at 6.0-7.5%.

In Q2 2021, Malaysia's manufacturing PMI fell to 39.9pts in June from 51.3pts in May, the lowest reading since April 2020. This was not completely unexpected given the stricter movement controls which dampened demand, curbed production and disrupted supply chains. IHS Markit, which publishes the monthly statistic, also indicated that business confidence had hit the lowest reading on record. Manufacturers surveyed expressed pessimism over the year-ahead outlook amid concerns about the duration of the pandemic, a stark contrast to their optimistic responses last month. Given the sustained weakness in the economy, we expect Bank Negara to maintain OPR at 1.75% in the upcoming policy meeting on 8 July, and to continue to resort to fiscal measures and stimulus, such as the recently launched RM150bn PEMULIH program. The central bank may share its latest 2021 GDP growth forecast (previously at 6.0-7.5%) in the upcoming meeting. Bloomberg's June polls are not yet released (May's poll was 5.7%), but recent forecasts have a wide range of 2.5%-6.3%.

In Q3 2021, Markit also indicated that manufacturers were increasingly confident that output would rise over the coming year, citing hopes that the end of the pandemic would encourage new projects to begin and aid a broad-based recovery in market demand. It also added that the degree of optimism reached the highest since April. Bank Negara maintained the OPR at 1.75% during the MPC meeting on 9 September. The recent spike in inflation was viewed as transitory and is projected to moderate, with core inflation to range between 0.5% and 1.5% for 2021.

In Q4 2021, Malaysia's manufacturing PMI improved further from 52.3pts in November to 52.8pts in December, the third straight month of growth in factory activity and the strongest since April.

Investment Outlook (Cont'd)

Production and new order volumes expanded aided by lifting of movement restrictions and demand recovery. New export sales also expanded on stronger demand from US and China. Despite mounting pressure on production lines, manufacturers scaled down workforce. On OPR, we expect Bank Negara to hike 25bps in 2022 and 2023 each respectively from the current 1.75% but economists are turning more hawkish on the back of persistent inflationary pressures. Post-3Q21 results earnings revisions, we project 5% decline in earnings for the FBM KLCI for 2022 but 10% growth excluding the Glove sector. Banks, Gaming and Transportation account for 75% of the ex-gloves growth for 2022.

In Q1 2022, Malaysian manufacturers reported a near-stagnation of operating conditions. Headline manufacturing PMI fell from 50.9pts in February to 49.6pts – the last time the reading was below 50 was in Sept 2021. New orders and output moderated for the third month running and at faster rates. Firms attributed weakening demand conditions to rising Covid-19 cases and higher input prices, with manufacturing capacity constrained by supply shortages, more recently exacerbated by the Russia-Ukraine war. Higher input costs have also prompted businesses to raise output charges at the sharpest rate since April 2021.

Bank Negara trimmed GDP growth forecast to 5.3-6.3% for 2022, from 5.5-6.5% previously. Despite the re-opening of borders and businesses following the lifting of Covid-19 restrictions, the central bank expects some impact from the Russia-Ukraine conflict. Headline inflation is also projected to average higher between 2.2% and 3.2% (versus 2.1% previously). It maintained the OPR at 1.75% in the recent MPC meeting, but we expect a 25bps hike in 2H22, and 25bps in 2023. The monetary tightening will be dependent on the inflation print, which is now running hot on the back of surging commodity prices and persistent supply-chain issues.

~ by CIMB-Principal Asset Management Berhad

Amlslamic Growth Fund

Equity markets have been volatile over fears of ongoing inflation pressures and tightening central bank policies. Rising uncertainty over the economic impact as energy and commodity prices continue to stay elevated also adds to the volatility. Nevertheless, we are cautiously optimistic for the equity market on the back of economic re-opening amid an endemic Covid-19 situation, along with accommodative fiscal policies to sustain moderate economic growth. In addition, local equity market will benefit from the rally of commodity prices and its attractive valuation relative to peers.

Investment Strategy

ANNUAL REPORT
2022

Investment-Linked Funds
For the Financial Year Ended 31 March 2022

Investment Strategy

AmMetLife Takaful Equity Fund, Balanced Fund, Sukuk Fund and Balanced Plus Fund

Equity Investment Strategy

Given the volatility, a balanced portfolio is warranted consisting of a mix of good dividend yielding stocks to provide a stable income stream and position in value stocks and beneficiaries of recovery plays.

Sukuk Fund Investment Strategy

Duration

We are maintaining portfolio duration at neutral to slight overweight against the benchmark following the recent sell-off. Yields are at attractive levels and we believe that sufficient rate hike buffers have been priced in.

Credit Selection

Overweight corporate bonds on still attractive spreads and lower volatility as we navigate through an unstable period with the US Fed set on more aggressive policy tightening.

~by AmFunds Management Berhad

Balanced Plus Fund Investment Strategy

Dana Al-Ilham

The Fund built up and maintained a high exposure in technology sector before reducing it towards the end of the period under review. We stayed overweight in this sector as we are positive on the long-term structural trends in the tech industry. In the same period under review, the Fund also increased exposure in selected material stocks to ride the commodity price rally while remained overweight in cyclical rebound sectors i.e. consumer discretionary, property and financial sectors, to ride the economy re-opening theme.

~by Eastspring Investments Berhad

Principal DALI Equity Growth Fund

In Q1 2021, we remained Neutral on Malaysia and remain proponents of the reopening theme and thus constructive on sectors such as Cyclical, Commodities and select Transport. As for tech, it has outperformed significantly, hence, we were very selective and focused on quality tech names while stayed cautious on richly valued companies.

We cautious on Gloves as earnings seem to have peaked despite ESG issues waning.

In Q2 2021, we remained cautious on Malaysia, given the prolonged movement controls and lack of clear re-rating

catalyst. As a result, we have lowered our portfolios betas recently. We were selective on stocks from a bottom-up basis that plays into the reopening theme and thus remain constructive on sectors such as Cyclical namely Consumer Discretionary and select Transport.

We turned positive on Technology, following the recent pullback, and maintain of our underweight stance on Gloves and Plantations.

In Q3 2021, we remained positive on Malaysia as movement controls ease, paving way for a full reopening of the economy, and domestic political issues abating. We continued to be selective on stocks from a bottom-up basis that plays into the reopening theme and thus remain constructive on cyclical sectors such as Consumer Discretionary and select Transport.

Sectors that benefited from certain government reforms such as systems providers, and fiscal pump-priming to resuscitate the economy such as Construction and Building Materials, could be in focus next.

We continued to overweight selective Technology companies and underweight Glove given their earnings prospects and ESG issues. Whilst we turned neutral on Plantation as the major companies seek to address ESG concerns and valuations have factored such concerns.

In Q4 2021, Investor sentiment remained dented by the one-off broad-based Prosperity Tax which hurts corporate earnings in 2022 and fears over Omicron albeit them waning. We therefore adopted a balanced approach with adequate diversification, straddling reopening plays and sectors with structural or secular growth stories. The former included value sectors such as Aluminum and Energy which have earnings upgrade potential.

We remained steadfast in our strategy to Overweight cyclical themes such as Consumer Discretionary, Energy, Basic Materials, and selective Tech albeit reducing the Overweight.

In Q1 2022, we continued to adopt a balanced approach, with a larger tilt to value over growth, and maintained adequate diversification. We remain over weighted on cyclical themes such as Consumer Discretionary, as well as Commodities, we have turned neutral on financials after the strong performance YTD.

We continued to trim expensive tech whilst remain invested in decent valued tech names with structural growth.

Investment Strategy (Cont'd)

Principal Islamic Lifetime Sukuk Fund

In Q1 2021, we viewed the valuations of govvies on the long end of the curve appear attractive. However, we remained caution that uncertainties remain and should take opportunity to sell on any upticks. We hold a barbell strategy to maximize potential returns while limiting risks. We overweight on corporates for better yield pickup. We took profit on those that hit our price target and move to new credits.

In Q2 2021, we remained our preferences on issuers with stronger and more resilient credit metrics that can withstand during the uncertain environment.

In Q3 2021, we saw improvement in local bond market sentiment following the appointment of our new PM and the unveiling of the new cabinet. Additionally, ample domestic liquidity was seen following the maturities seen for the period. We remained overweight on corporate bonds for better yield pickup and overall total return, and we continue to have a preference on names which are more resilient with stronger fundamentals, as well as better liquidity.

In Q4 2021, we maintained our preference on the credit segment with focus on the primary issuances which offer better yield pickup. We cautious on the potential curve re-pricing as credit spreads are tight and below long-term averages. For govvies, we took profit on the longer end of the curve to reduce the duration risk and switch out of those existing benchmark bonds which will be replaced in 2022. We continue to monitor the market on a good entry point when there is value.

In Q1 2022, the recent selloff in the MGS/GII yields has resulted in govvies looking more attractive with some parts of the curve pricing in 3-4 hikes in the future. Govvies appear attractive now following the sell off and may present some trading opportunities. However, we caution that govvies will continue to be volatile given the rising trend in global bond yields and heavy supply in this quarter domestically. We continued our preference on the credit segment for better yield pickup. We expect there will be more primary corporate bond supply before yields move higher and highlight the potential repricing risk. We would take profit and switch to the new primary credits to mitigate the near-term volatility. We remained neutral duration as external headlines are expected to continue to dampen sentiments in the domestic bond market.

ANNUAL REPORT
2022

Investment-Linked Funds
For the Financial Year Ended 31 March 2022

Summary of Financial Information **Statement by the Manager**

In the opinion of the Manager, the accompanying financial information of the Investment-linked Funds of AmMetLife Takaful Berhad comprising the AmMetLife Takaful Equity Fund, AmMetLife Takaful Sukuk Fund, AmMetLife Takaful Balanced Fund and AmMetLife Takaful Balanced Plus Fund set out on pages 41 to 66 have been prepared in accordance with the accounting policies as described in Note 2.2 to the financial information and the Policy Document on Investment-linked Business (BNM/RH/PD029-36) issued by Bank Negara Malaysia.

On behalf of AmMetLife Takaful Berhad,

Pathmanathan Perumal

Kuala Lumpur, Malaysia
17 June 2022

Summary of Financial Information

Independent Auditors' Report

Report on the audit of the financial information

Opinion

We have audited the financial information of AmMetLife Takaful Equity Fund, AmMetLife Takaful Sukuk Fund, AmMetLife Takaful Balanced Fund and AmMetLife Takaful Balanced Plus Fund (collectively referred to as "the Funds"), which comprise the statements of assets and liabilities as at 31 March 2022, and the statements of income and expenditure, statements of changes in net asset value of the Funds for the year then ended, and notes to the financial information, as set out on pages 41 to 66.

In our opinion, the accompanying financial information of the Funds as at 31 March 2022 are prepared, in all material respects , in accordance with the accounting policies as described in Note 2.2 to the financial information and the Policy Document on Investment linked Business issued by Bank Negara Malaysia.

Basis for Opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Information section of our report . We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

We draw attention to Note 2.1 to the financial information of the Funds, which describes the basis of accounting. The financial information of the Funds are prepared to assist the Funds in complying with the Policy Document on Investment linked Business issued by Bank Negara Malaysia. As a result, the financial information of the Funds may not be suitable for another purpose. Our report is intended solely for the unitholders of the Funds, as a body and should not be distributed to or used by parties other than the unitholders of the Funds. Our opinion is not modified in respect of this matter.

Independence and Other Ethical Responsibilities

We are independent of the Funds in accordance with the By Laws (on Professional Ethics, Conduct and Practice) of the Malaysian Institute of Accountants ("By Laws") and the International Code of Ethics for Professional Accountants (including International Independence Standards) ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the By Laws and the IESBA Code.

Information Other than the Financial Information and Auditors' Report Thereon

The Manager of the Funds (the "Manager") is responsible for the other information. The other information comprises the information contained in the Annual Report of the Funds, but does not include the financial information of the Funds and our auditors' report thereon. The Annual Report is expected to be made available to us after the date of our auditors' report.

Our opinion on the financial information of the Funds does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial information of the Funds, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial information of the Funds or our knowledge obtained in the audit or otherwise appears to be materially misstated.

When we read the Annual Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to the Manager and take appropriate action.

Responsibilities of the Manager for the Financial Information

The Manager is responsible for the preparation of financial information of the Funds in accordance with the accounting policies as described in Note 2.2 to the financial information and the Policy Document on Investment linked Business issued by Bank Negara Malaysia. The Manager is also responsible for such internal control as the Manager determine is necessary to enable the preparation of financial information of the Funds that are free from material misstatement, whether due to fraud or error.

Independent Auditors' Report (Cont'd)

Responsibilities of the Manager for the Financial Information (Cont'd)

In preparing the financial information of the Funds, the Manager is responsible for assessing the Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Manager either intends to liquidate the Funds or to cease operations, or have no realistic alternative but to do so.

Auditors' Responsibilities for the Audit of the Financial Information

Our objectives are to obtain reasonable assurance about whether the financial information of the Funds as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial information.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial information of the Funds, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Manager.
- Conclude on the appropriateness of the Manager's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial information of the Funds or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Funds to cease to continue as a going concern.

We communicate with the Manager regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Summary of Financial Information

Notes to the Financial Information

1. The manager and its principal activities

The investment-linked funds of AmMetLife Takaful Berhad ("the Manager") comprise AmMetLife Takaful Equity Fund, AmMetLife Takaful Sukuk Fund, AmMetLife Takaful Balanced Fund and AmMetLife Takaful Balanced Plus Fund (collectively known as "the Funds").

The Manager is a public limited liability company incorporated and domiciled in Malaysia and licensed under the Islamic Financial Services Act 2013 to carry out its principal activities. The registered office and principal place of business of the Company are located at 22nd Floor, Bangunan AmBank Group, No. 55 Jalan Raja Chulan, 50200 Kuala Lumpur and Level 23, Menara 1 Sentrum, No 201, Jalan Tun Sambanthan, 50470 Kuala Lumpur respectively.

The principal activities of the Manager is that of managing family takaful business including group takaful and investment-linked business.

There have been no significant changes in the nature of the principal activities of the Manager.

The Funds' activities are conducted strictly in accordance with the requirements of the Shariah principles and monitored by the Shariah Committee of the Manager.

The financial information were authorised for issue by the Board of Directors of the Manager in accordance with a resolution of the directors on 17 June 2022.

2. Significant accounting policies

2.1 Basis of preparation

The financial information of the Funds have been prepared in accordance with the accounting policies described in Note 2.2 to the financial information and the Policy Document on Investment-linked Business (BNM/RH/PD 029-36) issued by Bank Negara Malaysia.

The financial information have been prepared under the historical cost convention except as disclosed in the significant accounting policies in Note 2.2 to the financial information.

The financial information are presented in Ringgit Malaysia ("RM").

(a) Revenue recognition

Revenue is recognised when it is probable that the economic benefits associated with the transaction will flow to the funds and the amount of the revenue can be measured reliably.

- (i) Profit income is recognised on an accrual basis.
- (ii) Dividend income is recognised on a declared basis when the right to receive payment is established.
- (iii) Realised gains or losses on disposal of investments are recognised in the statements of income and expenditure as the difference between the net disposal proceeds and the carrying amount of the investments.

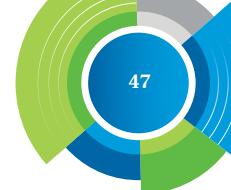

(b) Management Fee

Management fee is charged based on the Funds' daily net asset value, at the following rates:

AmMetLife Takaful Equity Fund	1.50% p.a.
AmMetLife Takaful Sukuk Fund	1.00% p.a.
AmMetLife Takaful Balanced Fund	1.50% p.a.
AmMetLife Takaful Balanced Plus Fund	1.50% p.a.

(c) Taxation

Income tax in the statements of income and expenditure comprises current and deferred tax. Current tax is the expected amount of income taxes payable in respect of the taxable income for the year and is measured using the tax rates that have been enacted at the date of the statement of assets and liabilities.

Notes to the Financial Information (Cont'd)

(c) Taxation (Cont'd)

Deferred tax is provided for using the liability method. In principle, deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised for all deductible temporary differences, to the extent that it is probable that taxable profits will be available against which the deductible temporary differences can be utilised.

Deferred tax is measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on the tax rates that have been enacted or substantively enacted at the date of the statements of assets and liabilities. Deferred tax is recognised as income or an expense in the statements of income and expenditure, except when it arises from a transaction which is recognised directly in unitholders' capital, in which case, the deferred tax is also recognised in unitholders' capital.

(d) Investments – financial assets

Investments are recognised in the statements of assets and liabilities when the Funds have become a party to the contractual obligations of the financial assets.

A financial asset is recognised initially, at its fair value plus, in the case of a financial asset not at fair value through profit or loss ("FVTPL"), transaction costs that are directly attributable to the acquisition of the financial asset.

The Funds classify the investments into financial assets at FVTPL and financing and receivables.

(i) Financial assets at FVTPL

Subsequent to the initial recognition, financial assets at FVTPL are re-measured at fair value. Fair value adjustments and realised gains/losses due to derecognition are recognised in the statements of income and expenditure. Transaction costs in respect of financial assets at FVTPL are expensed as they are incurred.

(e) Financial liabilities at amortised cost

Financial liabilities of the Funds, that are not designated at fair value through profit or loss, are classified as financial liabilities at amortised cost, where the substance of the contractual arrangement results in the Funds having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Funds' equity instruments.

After initial measurement, these financial instruments are subsequently measured at amortised cost using the effective profit rate method. Amortised cost is calculated by taking into account any discount or premium on the issue and costs that are an integral part of the effective profit rate method.

(f) Derecognition of financial assets and financial liabilities

(i) Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- The rights to receive cash flows from the asset have expired;
- The Funds have transferred the rights to receive cash flows from the asset or have assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement; and either:
- The Funds have transferred substantially all the risks and rewards of the asset, or
- The Funds have neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

Notes to the Financial Information (Cont'd)

(f) Derecognition of financial assets and financial liabilities (Cont'd)

(i) Financial assets (Cont'd)

When the Funds have transferred their rights to receive cash flows from an asset or have entered into a pass-through arrangement, and have neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Funds' continuing involvement in the asset. In that case, the Funds also recognise an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Funds have retained.

(ii) Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in the statements of income and expenditure.

(g) Determination of fair value

The fair value for financial instruments traded in active markets at reporting date is based on their quoted market price or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs.

For financial instruments not traded in an active market, the fair value is determined by using appropriate valuation techniques. Valuation techniques include the discounted cash flow method, comparison to similar instruments for which market observable prices exist, option pricing models, credit models and other relevant valuation models.

(h) Impairment of financial assets

The Funds assess at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred "loss event") and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated.

If, in a subsequent year, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed. Any subsequent reversal of an impairment loss is recognised in the statements of income and expenditure, to the extent that the carrying value of the asset does not exceed its amortised cost at the reversal date.

(i) Cash and cash equivalents

Cash and cash equivalents consist of cash at bank.

Notes to the Financial Information (Cont'd)

3. Investments

The composition, costs and fair values of the investments in Malaysia as at 31 March 2022 and 31 March 2021 are as detailed below:

Profil Korporat

AmMetLife Takaful merupakan perkongsian strategik antara AMMB Holdings Berhad (“Kumpulan AmBank”) dan MetLife International Holdings LLC (“MetLife”).

AmMetLife Takaful menawarkan pelbagai produk takaful yang komprehensif yang diedarkan melalui rangkaian Kumpulan AmBank yang mempunyai lebih daripada 200 cawangan AmBank dan AmMetLife di seluruh negara, tambahan lagi dengan kekuatan pasukan ejen takaful yang sah di seluruh Malaysia.

Perkongsian strategik ini menggabungkan kepakaran antarabangsa dan kekuahan kewangan MetLife dan kekuatan dan jangkauan tempatan Kumpulan AmBank untuk menjadi syarikat takaful yang mesra pelanggan dan moden di Malaysia.

Berserta dengan pengetahuan yang tinggi dan mendalam mengenai prinsip-prinsip dan nilai-nilai Shariah, kami memberi tumpuan bagi memenuhi keperluan pelanggan kami yang pelbagai dengan memberi penyelesaian yang inovatif di pelbagai peringkat kehidupan mereka, menjadikannya ia lebih mudah dan senang untuk seisi keluarga dan individu untuk mencapai jaminan kewangan dan meneruskan kehidupan yang lebih baik.

Objektif Dana Berkaitan Pelaburan

LAPORAN TAHUNAN
2022

Dana Berkaitan Pelaburan
Bagi Tahun Kewangan Berakhir 31 Mac 2022

Objektif Dana Berkaitan Pelaburan

1. Dana AmMetLife Takaful Equity

Dana ini bertujuan untuk memberikan pertumbuhan modal kepada pemegang sijil dalam jangka sederhana hingga panjang dengan melabur dalam portfolio sekuriti patuh Syariah dengan potensi pertumbuhan yang menggalakkan.

Pulangan kepada pemegang sijil akan diperoleh melalui peningkatan harga unit Dana.

2. Dana AmMetLife Takaful Sukuk

Dana ini bertujuan untuk memberikan peluang kepada pemegang sijil untuk memperoleh pendapatan yang lebih tinggi berbanding pendapatan purata yang diperoleh daripada deposit tetap Islam, dalam tempoh pelaburan jangka sederhana hingga panjang, terutamanya melalui pelaburan dalam pelbagai portfolio sekuriti pendapatan tetap Islam.

Pulangan kepada pemegang sijil akan diperoleh melalui peningkatan harga unit Dana.

3. Dana AmMetLife Takaful Balanced

Dana ini bertujuan untuk mencapai pertumbuhan modal sederhana dalam jangka sederhana hingga panjang dengan melabur dalam portfolio pelaburan patuh Syariah.

Pulangan kepada pemegang sijil akan diperoleh melalui peningkatan harga unit Dana.

4. Dana AmMetLife Takaful Balanced Plus

Dana ini bertujuan untuk memberikan peluang kepada Pemegang Sijil untuk memperoleh potensi pendapatan lebih tinggi berbanding pendapatan yang diperoleh daripada deposit tetap patuh Syariah dalam tempoh pelaburan jangka sederhana hingga panjang, dengan melabur dalam skim pelaburan kolektif patuh Syariah (“CIS”).

Pulangan kepada pemegang sijil akan diperoleh melalui peningkatan harga unit Dana.

Tinjauan Pasaran Pelaburan

Dana AmMetLife Takaful Equity, Balanced, Sukuk dan Balanced Plus

Tinjauan Pasaran Ekuiti

Pasaran ekuiti memulakan tempoh tinjauan dengan catatan lemah kerana sentimen yang terjejas oleh peningkatan kes Covid19 dan pelancaran vaksin yang perlahan di dalam negara, dengan kerisauan penangguhan pembukaan semula ekonomi domestik akibat dari pengenaan semula perintah kawalan berkurung oleh kerajaan. Perubahan risiko juga didorong oleh kebimbangan terhadap peningkatan hasil bon global berdasarkan jangkaan inflasi yang lebih tinggi, dengan isyarat daripada Rizab Persekutuan AS (Fed) bahawa ia akan bersedia untuk menaikkan kadar faedah lebih awal daripada sebelumnya. Indeks FBM Emas Syariah melonjak ke paras terendah 12,009.50 pada 12 Julai 2021. Walau bagaimanapun, pasaran ekuiti mula pulih pada Ogos 2021 lantaran peningkatan besar dalam kadar vaksinasi dan trend penurunan dalam kes Covid-19, membuka jalan untuk normalisasi dalam aktiviti ekonomi. Aktiviti pembelian juga disokong oleh kepulangan pelabur asing apabila ketidakstabilan politik kembali reda berikutan pelantikan Perdana Menteri yang baharu. Menjelang akhir tahun 2021, pasaran menjadi negatif sekali lagi dengan kebimbangan mengenai pertumbuhan ekonomi China yang perlahan, peningkatan hasil bon jangka panjang dan berita bahawa Rizab Persekutuan mungkin mula melepaskan sokongannya terhadap ekonomi negara.

Ekuiti memulakan tahun 2022 dengan penjualan saham teknologi, di tengah-tengah langkah berhati-hati terhadap tekanan inflasi yang berterusan dan langkah agresif oleh Rizab Persekutuan. Di samping itu, ketegangan geopolitik antara AS dengan Rusia terhadap Ukraine juga menyebabkan lebih banyak ketidakpastian dan kenaikan harga minyak mentah dan gas - justeru mewujudkan lebih banyak risiko inflasi. Walaupun ketidaktentuan meningkat, sentimen dalam pasaran tempatan pulih pada bulan Februari kerana pelabur mempertimbangkan kesan-kesan positif berikutan harga komoditi yang tinggi. Di samping itu, data ekonomi yang menggalakkan menunjukkan Malaysia menyaksikan pemulihan yang lebih kukuh pada tahun ini lantaran pembukaan semula ekonomi ketika Covid-19 bergerak ke tahap endemik dan seterusnya kembali meningkatkan sentimen pelaburan. Menjelang akhir tempoh tinjauan, pengambilan keuntungan muncul lantaran kebimbangan perintah berkurung di Shanghai berikutan peningkatan semula kes Covid-19 akan melanda aktiviti global, memburukkan lagi isu rantai bekalan dan akhirnya menambahkan tekanan inflasi.

Indeks FBM Hijrah Syariah mengakhiri tempoh tinjauan dengan kerugian sebanyak 5.61%, dan menutup pada 12,600.91 mata.

Tinjauan Pasaran Sukuk

Pada tahun 2021, ketidakpastian gelombang pandemik memberi pengaruh besar terhadap pertumbuhan global. Pengagihan vaksin yang tidak sekata membawa kepada pemulihan

ekonomi yang tidak sekata di kalangan negara-negara, dengan ekonomi maju memimpin pasaran baru dari segi kitaran perniagaan. Menjelang akhir tahun 2021, AS berubah menjadi agresif dalam menghadapi tekanan inflasi dan data pekerjaan yang kuat. Sebaliknya, KDNK Malaysia masih belum pulih ke tahap pra-pandemik, dan lebih mengutamakan tempoh dasar monetari akomodatif yang lebih lama. Perbezaan dalam dasar monetari mengakibatkan tahun yang tidak menentu bagi pasaran pendapatan tetap Malaysia. Oleh itu, keluk hasil Sekuriti Kerajaan Malaysia ("MGS") menurun dengan cara yang sama seperti keluk hasil Perbendaharaan AS. Dalam pasaran domestik, walaupun dengan inflasi domestik yang agak jinak dan dasar monetari akomodatif, rangsangan fiskal memberi tekanan ke atas hasil disebabkan oleh peningkatan bekalan bon berdaulat dan pelebaran defisit fiskal Malaysia.

Peristiwa utama pada suku pertama 2022 ialah perang Rusia-Ukraine dan peralihan mengejut Fed kepada pendirian yang lebih agresif. Perang antara Rusia dengan Ukraine yang berterusan telah menyebabkan peningkatan kebimbangan terhadap inflasi yang tinggi kerana kedua-dua negara ialah pengeluar komoditi utama. Pasaran pendapatan tetap Malaysia sebahagian besarnya kekal stabil pada Januari 2022 dan Februari 2022 apabila BNM menetapkan kadar dasar pada 1.75% dan mencecah nada yang agak dovish. Pelabur melihat lonjakan harga minyak dan potensi impaknya terhadap defisit belanjawan, bersama-sama dengan pengumuman pengeluaran KWSP sebanyak RM10k lagi sebagai satu kemajuan kerana pelabur menganggap impaknya boleh diurus. Walau bagaimanapun, pasaran bon tempatan tidak terkecuali daripada kekalahan bon global pada Mac 2022 seperti yang ditunjukkan oleh lonjakan hasil bon kerajaan tempatan.

~oleh AmFunds Management Berhad

Tinjauan Pasaran Dana AmMetLife Takaful Balanced Plus

Dana Al-Ilham

Pasaran ekuiti Malaysia menentang trend pulangan positif daripada pasaran serantau pada suku kedua 2021, kerana kes Covid-19 kekal tinggi walaupun kerajaan mengenakan perintah berkurung yang lebih ketat. Kerajaan mengumumkan penguatkuasaan PKP 3.0 pada 10 Mei 2021, tetapi sekatan untuk perintah berkurung ini tidak begitu ketat seperti PKP1. Walau bagaimanapun menjelang 28 Mei 2021, kerajaan mengumumkan bahawa perintah berkurung di seluruh negara yang ketat akan dikuatkuasakan dari 1 Jun 2021 (PKP Penuh) dan hanya perkhidmatan penting akan dibenarkan beroperasi. PEMERKASA dan pakej rangsangan sebanyak RM40b kemudiannya diumumkan pada pertengahan suku kedua 2021 berikutan pengumuman pengenaan PKP Penuh, dengan

Tinjauan Pasaran Pelaburan (Sambungan)

suntikan fiskal langsung sebanyak RM5b. PKP penuh yang bermula pada 1 Jun 2021 telah dilanjutkan selama 2 minggu lagi pada 28 Jun. Berdasarkan Pelan Pemulihan Negara, Fasa 1 (PKP Penuh) hanya akan berakhir jika purata kes harian menurun di bawah 4000 sehari, penggunaan katil ICU adalah sederhana, dan 10% daripada populasi telah diberi vaksin sepenuhnya. Sehingga 30 Jun 2021, purata kes Covid 7 hari di Malaysia adalah 5853, dan nilai R-Naught berada pada 1.05. Pada 28 Jun 2021, Kerajaan Malaysia telah mengumumkan pakej ekonomi (PEMULIH) bernilai RM150b dengan RM10b dijangka daripada suntikan fiskal langsung. Pada bulan tersebut, ketidakpastian politik meningkat apabila Yang di-Pertuan Agong mengumumkan bahawa Keadaan Darurat tidak akan dilanjutkan dan Parlimen harus bersidang semula secepat mungkin.

Pasaran ekuiti Malaysia memulakan suku ketiga 2021 dengan tumpuan pada pandemik Covid-19, kerana kes Covid kekal tinggi, menyebabkan sekatan selanjutnya terhadap perintah pergerakan, kerana banyak kilang yang tidak penting diminta tutup atau beroperasi pada kapasiti 10%. Politik menjadi tumpuan pada bulan Julai 2021 dan mengakibatkan terlalu banyak kelemahan dalam suku ketiga kerana Indeks FBMKLCI menurun di bawah sokongan psikologi 1,500. Sidang khas Parlimen yang bermula pada 26 Julai 2021 dan sepatutnya berlangsung sehingga 2 Ogos 2021, telah dipendekkan akibat kes Covid di kalangan mereka yang menghadiri Parlimen. Hal ini diikuti dengan banyak drama, apabila ordinan darurat dibatalkan secara arbitrari, tanpa persetujuan Yang di-Pertuan Agong dan tidak diundi di kedua-dua dewan Parlimen. Bulan Ogos menyaksikan peletakan jawatan Tan Sri Muhyiddin Yassin sebagai Perdana Menteri dan pelantikan Dato Seri Ismail Sabri sebagai Perdana Menteri Malaysia ke-9 setelah memperoleh 114 kerusi Parlimen (min 111 diperlukan untuk membentuk kerajaan). Sentimen pasaran bertambah baik dengan pengangkatan sumpah sebagai Perdana Menteri ke-9, kerana pemimpin pembangkang bersetuju untuk mencari titik persamaan dengan PM baru, dan menumpukan usaha dalam menangani wabak COVID dan memajukan ekonomi. Pasaran ekuiti Malaysia mengakhiri suku ketiga 2021 sebagai rantau yang agak positif, memandangkan sentimen pasaran serantau murung akibat penjualan di pasaran China dan AS. Pelabur digeruni oleh perkembangan negatif berturut-turut di China dan lonjakan hasil bon AS baru-baru ini. Di Malaysia, pelabur bimbang dengan berita mengenai rancangan kerajaan untuk mengetepikan faedah selama tiga bulan untuk peminjam berpendapatan rendah, dan cukai durian runtuh baharu serta cukai keuntungan modal yang sedang dipertimbangkan. Kes Covid di Malaysia telah menurun apabila Lembah Klang memasuki Fasa 2 Pelan Pemulihan Negara pada 10 Sept, dan dijangka memasuki Fasa 3 pada 1 Okt 2021. Menjelang akhir

bulan Sept 2021, 86% populasi dewasa Malaysia telah diberi vaksin sepenuhnya. Pelabur asing adalah pembeli bersih ekuiti Malaysia sebanyak RM0.7b untuk September, bulan kedua berturut-turut, tetapi masih kekal sebagai penjual bersih YTD sebanyak RM3.8b pada akhir suku ketiga 2021.

Pasaran ekuiti Malaysia memulakan suku keempat 2021 secara positif apabila harga komoditi melonjak pada bulan tersebut, yang merupakan rahmat bagi saham tenaga dan perlادangan. Harga minyak mentah Brent naik 7.75% pada bulan Oktober, manakala harga minyak sawit mentah (MSM) naik 12.15% dan kekal melebihi RM5000/tan. Malaysia membenarkan perjalanan antara negeri dan antarabangsa dari 10 Okt 2021 untuk penduduk yang diberi vaksin sepenuhnya, kerana Malaysia mencapai sasaran untuk menginokulasi 90% daripada populasi dewasa. Belanjawan 2022 diumumkan pada hari Jumaat terakhir bulan ini, dan sebelum pelancarannya, saham pembinaan dan harta tanah meningkat berdasarkan jangkaan Belanjawan 2022. Walau bagaimanapun, menjelang bulan November, pasaran ekuiti Malaysia memulakan trend yang lebih rendah, kerana sentimen pelabur bertukar negatif apabila butiran Belanjawan 2022 difahami. Pengumuman Cukai Makmur (prosperity tax) akan memberi impak negatif terhadap perolehan daripada cukai durian runtuh korporat sekali sahaja, dan penghapusan pengecualian cukai ke atas pendapatan sumber asing (hal ini kemudian ditangguhkan ke 2026). Menaikkan Duti Setem untuk transaksi saham sebanyak 50% dan pemansuhan had duti setem sebanyak RM200 dari 1 Jan 2022 boleh menjelaskan aktiviti perdagangan dalam pasaran saham. Penjualan di pasaran juga sebahagiannya disebabkan oleh kebimbangan terhadap ancaman varian Omicron Covid-19 terhadap pemulihran ekonomi global. Faktor lain yang mungkin melemahkan sentimen pasaran pada bulan Nov termasuk kebimbangan terhadap ESG kerana Dyson mengumumkan bahawa ia telah memutuskan hubungan dengan ATA IMS, berikutan audit ke atas amalan buruhnya. Pasaran ekuiti Malaysia menutup suku keempat 2021 lebih tinggi disebabkan oleh hiasan luar akhir tahun dengan FBMKLCI meningkat 1.5% pada hari perdagangan terakhir tahun tersebut. Kebimbangan terhadap kemunculan varian Omicron berkurangan apabila varian tersebut, walaupun nampaknya lebih mudah berjangkit, mengakibatkan gejala yang lebih ringan. Walau bagaimanapun, kes Covid baharu di seluruh dunia melonjak selepas pertengahan bulan Disember melebihi paras tertinggi sebelumnya dalam kes harian yang dilaporkan, hal ini mengakibatkan kerajaan memperkenalkan semula sekatan aktiviti sosial, dengan sesetengah kerajaan memilih untuk kembali kepada hanya membenarkan perniagaan penting dibuka. Walau bagaimanapun, tahap vaksinasi telah meningkat dengan ketara, Malaysia telah mencapai 78.4% jumlah populasi

Tinjauan Pasaran Pelaburan (Sambungan)

yang diberi vaksin sepenuhnya pada akhir Dis 2021, dengan 6.6 juta suntikan penggalak diberikan setakat ini (hampir 20% daripada populasi). Malaysia mengalami hujan lebat selama tiga hari yang mengakibatkan banjir terburuk di bahagian tengah Malaysia, yang tidak pernah dialami sejak 50 tahun dahulu. Setakat ini angka kematian akibat banjir adalah 46, dengan anggaran 50k-70k orang dipindahkan akibatnya. Banjir teruk mengganggu pengeluaran kilang dan akan menjelaskan aktiviti perdagangan pada bulan Disember.

Pasaran ekuiti Malaysia memulakan 2022 dengan catatan lebih rendah berikutan kebimbangan terhadap risiko perolehan, kenaikan kadar faedah global dan risiko politik. Minit FOMC Rizab Persekutuan AS untuk mesyuarat Disember mengesahkan berakhirnya pembelian Fed pada Mac 2022, dan memberi tekanan terhadap kadar faedah. Dengan Rizab Persekutuan AS yang lebih agresif, kenaikan kadar yang akan datang dijangka akan membebangkan pertumbuhan dan juga saham teknologi. Saham teknologi di AS mengalami penurunan terburuk pada Jan 2022 sejak pandemik Covid-19 bermula pada Mac 2020, dengan NASDAQ turun 8.98% (USD). Begitu juga di Malaysia, Indeks Teknologi KL merosot 15.32% pada Jan 2022. Krisis Ukraine-Rusia meningkat secara mendadak pada minggu ke-3 Feb 2022 selepas Rusia melancarkan pencerobohan ketenteraan berskala penuh terhadap Ukraine. Harga minyak mentah Brent mendahului USD100/bbl buat kali pertama sejak 2014 berikutan mogok ketenteraan dan kemudiannya melonjak melebihi USD130/bbl selepas AS dan UK mengumumkan larangan import minyak Rusia. Harga komoditi berkaitan makanan melonjak apabila Rusia dan Ukraine bersama-sama menyumbang kira-kira 29% daripada eksport gandum global, manakala Ukraine adalah pengekspor jagung keempat utama. Rusia adalah pengeluar gas asli terbesar, yang digunakan sebagai bahan mentah perindustrian dan bahan api untuk pengeluaran baja nitrogen. Pasaran ekuiti di Malaysia bersemangat berikutan pemulihian dalam sektor perladangan yang mendapat manfaat daripada rekod harga MSM tinggi yang mencelah parast tertinggi melebihi RM8000/T semasa suku pertama 2022. Musim keputusan suku keempat 2021 melaporkan perolehan yang lebih kukuh daripada jangkaan kerana syarikat mendapat manfaat daripada harga komoditi yang lebih tinggi (MSM dan minyak mentah) dan jualan yang lebih baik berikutan penarikan balik larangan perjalanan antara negeri pada bulan Okt 2021. Pilihan raya Negeri Johor diadakan pada 12 Mac 2022, yang menyaksikan parti Barisan Nasional (BN) memenangi majoriti dua pertiga, menguasai 40 daripada 56 kerusi yang dipertandingkan. UMNO menyumbang kepada kemenangan 33 kerusi. Pelabur asing adalah pembeli bersih ekuiti untuk suku pertama 2022 sebanyak RM6.3b.

FBM KLCI menutup tempoh tinjauan pada 1,587.36 mata, naik 0.88%. Indeks FBM Emas (FBMEmas) yang lebih luas menutup

tempoh tinjauan dengan catatan lebih rendah sebanyak 1.96%. Indeks MSCI Asia Pasifik kecuali Jepun merosot sebanyak 12.73% dalam USD.¹

¹Sumber: Bloomberg: Indeks Dunia ~oleh Eastspring Investments Berhad

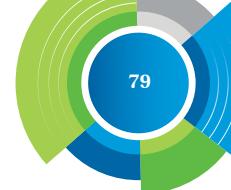

Dana Principal DALI Equity Growth

Pada suku pertama 2021, Indeks FTSE Bursa Malaysia Emas Syariah ("FBMS") meningkat 424.33 mata atau 3.30% kepada 13,272.50 mata pada April. Sektor Sarung Tangan meningkat berikutan lonjakan kes COVID-19 di dalam dan luar negara terutamanya di India, sementara pembukaan semula pasaran saham mendapat sambutan baik. Indeks sektor Penjagaan Kesihatan meningkat 15%, diikuti oleh Industri (+4), Pengangkutan (+4%), Teknologi (+3%) dan Pembinaan (+2%), manakala Tenaga mencatatkan prestasi terburuk, turun 3%.

Pada suku pertama 2021, Indeks FTSE Bursa Malaysia Emas Syariah ("FBMS") menurun 594.63 mata atau -4.666% kepada 12,178.28 mata pada Jun. Walaupun Sektor Sarung Tangan dan Perladangan adalah punca utama penurunan tersebut, sentimen pasaran secara keseluruhan terjejas oleh kerajaan Malaysia yang melaksanakan perintah berkurng secara menyeluruh mulai 1 Jun untuk memerangi peningkatan kes COVID-19 di dalam negara. Hal ini menyebabkan kelewatan peralihan ke Fasa 2 Pelan Pemulihran Negara. Kesimpulannya, Fasa 2 yang dijadualkan bermula 1 Julai, adalah bersyarat apabila kes harian jatuh di bawah 4,000, sistem kesihatan awam tidak lagi berada di bawah tekanan yang ketara dan 10% populasi diimunkan. Melainkan sektor Kewangan, Pengangkutan dan REIT, semua sektor lain berada di zon merah dan diterajui oleh sektor Penjagaan Kesihatan, Perladangan dan Hartanah.

Pada suku ketiga 2021, Indeks FTSE Bursa Malaysia Emas Syariah ("FBMS") menurun 391.45 mata atau -3.07% kepada 12,359.01 mata pada September. Pelabur dikejutkan dengan langkah mengejut oleh MOF yang meminta bank tempatan mengetepikan bayaran faedah untuk pinjaman di bawah moratorium pada suku keempat 2021 untuk peminjam dalam kategori B50, dan kebimbangan bahawa kerajaan mungkin mengenakan levi cukai durian runtuh atau cukai keuntungan modal untuk meningkatkan hasil bagi membaiayai langkah-langkah rangsangan. Debacle Evergrande China dan tantrum tirus AS mungkin juga telah menambah pesimisme.

Pada suku keempat 2021, Indeks FTSE Bursa Malaysia Emas Syariah ("FBMS") meningkat 134.48 mata atau +1.1 pada Disember, dan menamatkan 2021 pada 12,263.10 mata yang mewakili penurunan sebanyak -6.8% bagi tahun tersebut. Pelabur menghela nafas lega kerana penemuan yang menggalakkan mengenai keterukan varian Covid terkini telah diterbitkan dan

Tinjauan Pasaran Pelaburan (Sambungan)

data menunjukkan penurunan dalam kes baharu dan kadar kemasukan ke hospital. Pembukaan semula pasaran saham dan sektor Teknologi menguasai papan pendahulu, manakala saham Sektor Sarung Tangan melepaskan beberapa keuntungan mereka sebelum ini.

Pada suku pertama 2022, Indeks FTSE Bursa Malaysia Emas Syariah ("FBMS") menurun 174 mata atau 1.44%. Sektor pembinaan meraih keuntungan terbesar dan hal ini didorong oleh jangkaan pemulihan pekerjaan, diikuti oleh sektor Telco dan Kewangan. Sektor teknologi melantun apabila pelabur menyesuaikan diri dengan kenaikan kadar faedah Fed, yang menyaksikan kenaikan pertama sebanyak 25bps. Sektor pelancongan juga menyaksikan minat dengan pembukaan semula sempadan pada 1 April. Komoditi (Perlادangan, Tenaga dan Alum/Steel) diperbetulkan berikutan rali yang kuat pada bulan sebelumnya yang dicetuskan oleh Rusia-Ukraine.

Dana Principal Islamic Lifetime Sukuk

Pada suku pertama 2021, kami menyaksikan pasaran bon Malaysia tidak terlepas daripada penjualan global dan ditambah dengan kebimbangan domestik kami sendiri, keluk hasil MGS menurun dan mungkin didagangkan pada salah satu keluk yang paling curam sejak kebelakangan ini, dengan sebaran berjangka yang didagangkan melebihi purata jangka panjang dan jangka pendeknya. Kecuraman jangka panjang sekarang masih mencerminkan risiko dasar dalam pelaburan Bon Ringgit Malaysia. Untuk sebaran jangka panjang menguncup kembali ke tahap sejarah, kita perlu melihat kerajaan mewujudkan kestabilan yang lebih baik serta disiplin yang lebih kukuh untuk meningkatkan kedudukan fiskal. Kadar rintangan ini hanya boleh dicapai dalam era pemulihan pasca Covid (yang merupakan kes asas kita). Akhir sekali, aliran dana juga boleh menjadi pemangkin lain yang mendorong sebaran menjadi lebih sempit. Walau bagaimanapun, jika faktor asas tidak diperbaiki secara berterusan, sebaran boleh menjadi lebih tinggi lagi apabila aliran keluar berlaku. Oleh itu, kedudukan Sekuriti Kerajaan Malaysia dalam portfolio harus lincah.

Pada suku kedua 2021, perbelanjaan fiskal yang lebih tinggi terus menjadi cabaran bagi pasaran untuk menyerap bekalan bon kerajaan tambahan. Cabaran utama yang masih membebani sentimen pasaran bon tempatan adalah kebimbangan pengeluaran pencen yang berterusan kerana sebahagian besar tekanan pengeluaran mungkin berlaku pada suku kedua 2021 dan harus mengukuhkan hasil bon dengan lebih curam berbanding pasaran serantau. Kini kami menantikan suku ketiga 2021 untuk menjadi tetingkap sebaran jangka panjang bagi mengetatkan lebih dekat dengan purata jangka panjang dengan sebahagian besar kluster kematangan Sekuriti Kerajaan Malaysia sekitar bulan Julai hingga November. Risiko kepada ramalan kami

adalah kelewatan yang tidak dijangka dalam pemulihan global dan domestik, keperluan pembiayaan yang lebih tinggi untuk rangsangan fiskal dan apa-apa risiko politik yang berpotensi.

Pada suku ketiga 2021, kami menjangkakan RM32.2b (MGS: RM25.2b; MGII: RM7B) Sekuriti Kerajaan Malaysia yang matang. Apabila kita melihat kira-kira RM42b terbitan baharu, terbitan bersih yang kecil akan menyaksikan beberapa sokongan untuk pasaran bon tempatan kerana pelabur akan melihat untuk membawa kedudukan mereka ke depan. Kemudahan i-Citra baharu ini dijangka akan menyaksikan pengeluaran sehingga RM30b. Walau bagaimanapun, anggaran ini biasanya konservatif dan pengeluaran sebenarnya mungkin kurang kerana kebanyakan ahli yang mudah terpengaruh telah menghabiskan baki mereka. Kami terus melihat kecairan domestik kelihatan sihat dengan BTC yang kukuh di semua lelong. Pada masa penulisan laporan ini, kami melihat lelong GII 20y yang memperoleh BTC sebanyak 2.687x pada saiz keseluruhan RM4.5b yang dijangkakan dengan jumlah bidaan lebih tinggi daripada julat untuk lelong 20y-30y YTD yang menunjukkan kecairan domestik yang mencukupi. Pada masa ini, masih tidak diketahui sama ada Kerajaan akan menaikkan nisbah hutang statutori kepada KDNK daripada 60% kepada 65%, atau merancang untuk menurunkannya semula. Akta Langkah-Langkah Sementara 2020 menyaksikan had hutang dinaikkan daripada 55% kepada 60% dan menyatakan bahawa peningkatan had hutang adalah sehingga 31 Disember 2022. Sebarang peningkatan selanjutnya menunjukkan penyataan fiskal yang lebih tajam atau jangka masa untuk hutang kepada KDNK boleh dipanjangkan dan hal ini merupakan faktor negatif bagi agensi penarafan.

Pada suku keempat 2021, bahagian hadapan keluk terutamanya MGS 3 tahun kelihatan lebih baik berdasarkan purata sejarah berikutan keluk hasil berdaulat yang rata secara berterusan. Pada bulan tersebut, sebaran kredit diperketat di seluruh segmen tenor dan penarafan terutamanya untuk keluk jangka panjang kerana keluk hasil bon korporat menurun dengan tempoh 15 tahun dan ke atas bergerak lebih rendah sebanyak 8-13bps dan 7-11bps untuk segmen AAA dan AA2 masing-masing. Sebaran kredit adalah di bawah purata jangka panjang. Dengan sasaran deficit fiskal sebanyak 6% untuk 2022 dan kematangan MGS/MGII yang besar pada tahun 2022 berjumlah RM78.9 bilion, kami menganggarkan pembiayaan kasar MGS/MGII untuk 2022 sekitar RM165 bilion (2021: RM160 bilion dan 2020: RM148.8 bilion) memandangkan pengurusan kematangan yang proaktif melalui pertukaran hutang dan fleksibiliti dalam strategi pembiayaan kerajaan.

Pada suku pertama 2022, walaupun harga minyak meningkat, kami mengekalkan anggaran kami untuk pembiayaan MGS/MGII kasar untuk 2022 kepada sekitar RM165 bilion (2021: RM160

Tinjauan Pasaran Pelaburan (Sambungan)

bilion dan 2020: RM148.8 bilion) – kerana kami percaya kesan kenaikan harga Brent sebahagian besarnya neutral dan boleh diurus. Anggaran kami juga berdasarkan sasaran defisit fiskal sebanyak 6% untuk 2022 dan kematangan MGS/MGII yang besar pada tahun 2022 berjumlah RM78.9 bilion. Berdasarkan kalender lelong 2022, 36 lelong bon kerajaan (18MGS dan 18MGII) dengan 14 penempatan persendirian lebih cenderung ke arah 15 tahun-30 tahun (15 lelong) dan berkemungkinan akan lebih dimajukan dengan 19 lelong dengan anggaran saiz terbitan sebanyak RM86.5 bilion yang disasarkan untuk diterbitkan pada separuh pertama 2022. Terdapat 4 lelong yang akan diadakan pada bulan April dan tiga daripada empat lelong tersebut akan menjadi bon penanda aras baharu. Suku kedua 2022 akan menyaksikan terbitan bersih tertinggi Sekuriti Kerajaan Malaysia untuk tahun ini dengan hanya RM11 bilion kematangan pada bulan April.

~oleh CIMB-Principal Asset Management Berhad

Dana AmlIslamic Growth

Pasaran ekuiti memulakan tempoh tinjauan dengan catatan lemah kerana sentimen terjejas oleh peningkatan kes Covid19 dan pelancaran vaksin yang perlahan di dalam negara, dengan kerisauan penangguhan pembukaan semula ekonomi domestik selanjutnya akibat pengenaan semula perintah berkurung. Selera risiko juga didorong oleh keimbangan terhadap peningkatan hasil bon global berdasarkan jangkaan inflasi yang lebih tinggi, dengan isyarat daripada Rizab Persekutuan AS (Fed) bahawa ia akan bersedia untuk menaikkan kadar faedah lebih awal daripada sebelumnya. Indeks FBM Emas Syariah melonjak ke paras terendah 12,009.50 pada 12 Julai 2021. Walau bagaimanapun, pasaran ekuiti mula pulih pada Ogos 2021 lantaran peningkatan besar dalam kadar vaksinasi dan trend penurunan dalam kes Covid-19, membuka jalan untuk normalisasi dalam aktiviti ekonomi. Aktiviti pembelian juga disokong oleh kepulangan pelabur asing apabila ketidakstabilan politik reda berikutan pelantikan Perdana Menteri yang baharu. Menjelang akhir tahun 2021, pasaran menjadi negatif sekali lagi dengan keimbangan mengenai pertumbuhan ekonomi China yang perlahan, peningkatan hasil bon jangka panjang dan berita bahawa Rizab Persekutuan mungkin mula melepaskan

sokongannya terhadap ekonomi.

Ekuiti memulakan tahun 2022 dengan penjualan saham teknologi, di tengah-tengah langkah berhati-hati terhadap tekanan inflasi yang berterusan dan langkah agresif oleh Rizab Persekutuan. Di samping itu, ketegangan geopolitik antara AS dengan Rusia terhadap Ukraine juga menyebabkan lebih banyak ketidakpastian dan kenaikan harga minyak mentah dan gas - justeru mewujudkan lebih banyak risiko inflasi. Walaupun ketidaktentuan meningkat, sentimen dalam pasaran tempatan pulih pada bulan Februari kerana pelabur mempertimbangkan kesan-kesan positif berikutnya harga komoditi yang tinggi. Di samping itu, data ekonomi yang menggalakkan menunjukkan Malaysia menyaksikan pemulihan yang lebih kukuh pada tahun ini lantaran pembukaan semula ekonomi ketika Covid-19 bergerak ke tahap endemik dan seterusnya mendorongkan sentimen. Menjelang akhir tempoh tinjauan, pengambilan keuntungan muncul lantaran keimbangan perintah berkurung di Shanghai berikutan peningkatan semula kes COVID-19 yang akan melanda aktiviti global, memburukkan lagi isu rantaian bekalan dan akhirnya menambahkan tekanan inflasi.

Indeks FBM Hijrah Syariah mengakhiri tempoh tinjauan dengan kerugian sebanyak 7.04%, dan menutup pada 11,943.35 mata.

LAPORAN TAHUNAN
2022

Dana Berkaitan Pelaburan
Bagi Tahun Kewangan Berakhir 31 Mac 2022

Prospek Pelaburan

Dana AmMetLife Takaful Equity, Balanced, Sukuk dan Balanced Plus

Prospek Pasaran Ekuiti

Pasaran ekuiti tidak menentu lantaran kebimbangan tentang tekanan inflasi yang berterusan dan pengetatan dasar bank pusat. Ketidakpastian yang semakin meningkat terhadap impak ekonomi apabila harga tenaga dan komoditi terus meningkat juga menambahkan ketidakstabilan pasaran. Walau bagaimanapun, kami optimis terhadap pasaran ekuiti berikutan pembukaan semula ekonomi di tengah-tengah situasi endemik Covid-19, bersama-sama dengan dasar fiskal akomodatif untuk mengekalkan pertumbuhan ekonomi yang sederhana. Di samping itu, pasaran ekuiti tempatan akan mendapat manfaat daripada kenaikan harga komoditi dan penilaianya yang menarik berbanding pasaran setara.

Prospek Pasaran Sukuk

Walaupun hasil telah meningkat ke tahap pra-pandemik, sentimen terhadap pasaran bon domestik akan kekal menurun berdasarkan tindakan Fed yang agresif dan komen BNM baru-baru ini mengenai bekalan bon tempatan. Keluk hasil akan ditekan oleh ketidakpastian dan jangkaan bahawa BNM akan memulakan kitaran pengetatan kenaikan kadar Fed.

Dengan semakan sederhana BNM terhadap pertumbuhan dan ramalan inflasi untuk 2022, kami terus menjangkakan kenaikan kadar 1-2 oleh BNM pada separuh kedua tahun ini. Walau bagaimanapun, kenyataan baru-baru ini oleh Fed yang merujuk kepada pengetatan yang lebih agresif mungkin menyebabkan BNM membawa kenaikan kadar kepada suku kedua tahun ini. Pertimbangan utama adalah data ekonomi akan datang yang akan memberikan petunjuk tentang daya tahan pemulihian semasa.

~oleh AmFunds Management Berhad

Prospek Pasaran Dana AmMetLife Takaful Balanced Plus

Dana Al-Ilham

Selepas dua bulan konflik Rusia/Ukraine berlaku, resolusi ke arah gencatan senjata masih belum dicapai. Maka harga komoditi mungkin akan kekal lebih tinggi untuk tempoh yang lebih lama. Risiko global lain yang perlu dihadapi termasuk tekanan inflasi yang lebih tinggi yang mengakibatkan rizab Persekutuan AS menaikkan kadar dengan lebih cepat dan lebih agresif. Walau bagaimanapun, apabila Malaysia bergerak ke arah fasa endemik selepas 1 April 2022, pembukaan semula akan membantu menyokong pemulihan ekonomi. PM mengumumkan bahawa mulai 1 Mei 2022 kelonggaran sekatan selanjutnya seperti membenarkan pilihan untuk tidak memakai pelitup muka di luar rumah, tidak perlu mendaftar masuk dengan MySejahtera, penjarakan sosial tidak lagi diperlukan,

dan pelancong yang diberi vaksin sepenuhnya tidak lagi perlu melakukan ujian Covid-19 sebelum meninggalkan Malaysia dan juga semasa ketibaan, dan insurans Covid-19 tidak lagi diperlukan untuk semua pelancong yang memasuki Malaysia. Kejayaan parti BN dalam Pilihan Raya Negeri Johor baru-baru ini akan mencetuskan spekulasi bahawa PRU15 mungkin diadakan selepas Julai 2022. Kemenangan yang meyakinkan oleh mana-mana pihak akan menjadi faktor positif ke arah kerajaan dan pembuatan dasar yang lebih stabil. Walaupun terdapat banyak potensi halangan pertumbuhan ekonomi, apa-apa pembetulan di pasaran akan memberi peluang yang baik untuk mengumpul saham yang kukuh.

~oleh Eastspring Investments Berhad

Dana Principal DALI Equity Growth

Pada suku pertama 2021, PMI pembuatan Malaysia meningkat kepada rekod 53.9 mata pada April daripada 49.9 mata pada Mac, hal ini menunjukkan bahawa ekonomi terus pulih daripada pandemik ini. Kali terakhir ekonomi menunjukkan perkembangan adalah pada Julai 2020. Output juga meningkat buat kali pertama dalam tempoh sembilan bulan, manakala pesanan baharu juga meningkat semula. Jualan eksport meningkat buat kali pertama sejak November 2019 apabila permintaan di seluruh Asia dan AS pulih. Walau bagaimanapun, terdapat penurunan dalam pembaharuan penggajian manakala inflasi kos input meningkat ke tahap tertinggi dalam tempoh lebih empat tahun, menurut IHS Markit. BNM dijangka mengekalkan OPR pada 1.75% semasa mesyuarat dasar pada Mei. Terdapat jangkaan lonjakan inflasi sebanyak 2.5-4.0% tahun ini tetapi kami menjangkakan bank pusat akan mengekalkan dasar monetari akomodatif dan sebaliknya menggunakan langkah fiskal dan rangsangan untuk menyokong ekonomi. Sebagai kesimpulan, Bank Negara mencatatkan pertumbuhan KDNK 2021 pada 6.0-7.5%.

Pada suku kedua 2021, PMI pembuatan Malaysia jatuh kepada 39.9 mata pada Jun daripada 51.3 mata pada Mei, bacaan terendah sejak April 2020. Hal ini bukan tidak dijangka sama sekali memandangkan kawalan pergerakan yang lebih ketat telah mengurangkan permintaan, mengekang pengeluaran dan mengganggu rantai bekalan. IHS Markit, yang menerbitkan statistik bulanan, juga menunjukkan bahawa keyakinan perniagaan telah mencapai bacaan terendah dalam rekod. Pengilang yang ditinjau menunjukkan pesimisme terhadap prospek tahun depan di tengah-tengah kebimbangan tentang tempoh pandemik, berbeza dengan tindak balas optimis mereka bulan lalu. Memandangkan kelemahan ekonomi yang berterusan, kami menjangkakan Bank Negara akan mengekalkan OPR pada 1.75% dalam mesyuarat dasar yang akan datang pada 8 Julai, dan

Prospek Pelaburan (Sambungan)

untuk terus mengambil langkah-langkah fiskal dan rangsangan, seperti program PEMULIH RM150bn yang dilancarkan baru-baru ini. Bank pusat mungkin berkongsi ramalan pertumbuhan KDNK 2021 terkini (sebelum ini pada 6.0-7.5%) dalam mesyuarat yang akan datang. Tinjauan Bloomberg pada bulan Jun belum dikeluarkan (tinjauan pendapat Mei adalah 5.7%), tetapi ramalan baru-baru ini mempunyai julat yang luas antara 2.5%-6.3%.

Pada suku ketiga 2021, Markit juga menunjukkan bahawa pengeluar semakin yakin bahawa pengeluaran akan meningkat pada tahun yang akan datang, dengan harapan bahawa berakhirnya wabak ini akan mendorong projek baharu dimulakan dan membantu pemulihan permintaan pasaran secara meluas. Markit juga mengatakan bahawa tahap optimisme telah mencapai tahap tertinggi sejak April. Bank Negara mengekalkan OPR pada 1.75% semasa mesyuarat MPC pada 9 September. Lonjakan inflasi baru-baru ini dilihat sebagai sementara dan diunjurkan sebagai sederhana, dengan inflasi teras berkisar antara 0.5% hingga 1.5% untuk 2021.

Pada suku keempat 2021, PMI pembuatan Malaysia bertambah baik daripada 52.3 mata pada November kepada 52.8 mata pada Disember, bulan ketiga berturut-turut yang mengalami pertumbuhan dalam aktiviti kilang dan yang paling kukuh sejak April. Pengeluaran dan jumlah pesanan baharu meningkat lantaran penarikan balik sekatan pergerakan dan pemulihan permintaan. Jualan eksport baharu juga meningkat lantaran permintaan yang lebih kukuh dari AS dan China. Walaupun tekanan meningkat pada barisan pengeluaran, pengeluar masih mengurangkan tenaga kerja. Mengenai Kadar Dasar Semalam (OPR), kami menjangkakan Bank Negara akan meningkatkan OPR sebanyak 25bps masing-masing pada 2022 dan 2023 daripada kadar semasa 1.75% tetapi ahli ekonomi menjadi lebih agresif berikutan tekanan inflasi yang berterusan. Berdasarkan semakan perolehan pasca suku ketiga 2021, kami mengunjurkan penurunan perolehan sebanyak 5% untuk FBM KLCI tahun 2022 tetapi pertumbuhan 10% tidak termasuk sektor Sektor Sarung Tangan. Bank, Permainan dan Pengangkutan menyumbang 75% daripada pertumbuhan melainkan Sektor Sarung Tangan untuk 2022.

Pada suku pertama 2022, pengeluar Malaysia melaporkan keadaan operasi yang hampir tidak menentu. PMI pembuatan utama jatuh daripada 50.9 mata pada Februari kepada 49.6 mata – kali terakhir bacaan adalah di bawah 50 pada Sept 2021. Pesanan dan pengeluaran baharu adalah sederhana untuk bulan ketiga yang beroperasi dan pada kadar yang lebih pantas. Firma mengaitkan keadaan permintaan yang lemah dengan peningkatan kes Covid-19 dan harga input yang lebih tinggi, dengan kapasiti pembuatan dikekang oleh kekurangan bekalan, baru-baru ini diburukkan lagi oleh perang Rusia-Ukraine. Kos

input yang lebih tinggi juga telah mendorong perniagaan untuk menaikkan caj output pada kadar paling tajam sejak April 2021.

Bank Negara mengurangkan unjuran pertumbuhan KDNK kepada 5.3-6.3% untuk 2022, daripada 5.5-6.5% sebelum ini. Walaupun pembukaan semula sempadan dan perniagaan berikutan penarikan balik sekatan Covid-19, bank pusat menjangkakan beberapa kesan daripada konflik Rusia-Ukraine. Inflasi utama juga diunjurkan dengan purata lebih tinggi antara 2.2% hingga 3.2% (berbanding 2.1% sebelum ini). Ia mengekalkan OPR pada 1.75% dalam mesyuarat MPC baru-baru ini, tetapi kami menjangkakan kenaikan 25bps pada separuh kedua 2022, dan 25bps pada 2023. Pengetatan monetari akan bergantung kepada cetakan inflasi, yang kini menjadi hangat berikutan kenaikan harga komoditi dan isu rantaian bekalan yang berterusan.

Dana Principal Islamic Lifetime Sukuk

Pada suku pertama 2021, PMI pembuatan Malaysia meningkat kepada rekor 53.9 mata pada April daripada 49.9 mata pada Mac, hal ini menunjukkan bahawa ekonomi terus pulih daripada pandemik ini. Kali terakhir ekonomi menunjukkan perkembangan adalah pada Julai 2020. Output juga meningkat buat kali pertama dalam tempoh sembilan bulan, manakala pesanan baharu juga meningkat semula. Jualan eksport meningkat buat kali pertama sejak November 2019 apabila permintaan di seluruh Asia dan AS pulih. Walau bagaimanapun, terdapat penurunan dalam pembaharuan penggajian manakala inflasi kos input meningkat ke tahap tertinggi dalam tempoh lebih empat tahun, menurut IHS Markit. BNM dijangka mengekalkan OPR pada 1.75% semasa mesyuarat dasar pada Mei. Pada suku kedua 2021, PMI pembuatan Malaysia jatuh kepada 39.9 mata pada Jun daripada 51.3 mata pada Mei, bacaan terendah sejak April 2020. Hal ini bukan langsung tidak dijangka memandangkan kawalan pergerakan yang lebih ketat telah mengurangkan permintaan, mengekang pengeluaran dan mengganggu rantaian bekalan. IHS Markit, yang menerbitkan statistik bulanan, juga menunjukkan bahawa keyakinan perniagaan telah mencapai bacaan terendah dalam rekod. Pengilang yang ditinjau menunjukkan pesimisme terhadap prospek tahun depan di tengah-tengah kebimbangan tentang tempoh pandemik, berbeza dengan tindak balas optimis mereka bulan lalu. Memandangkan kelemahan ekonomi yang berterusan, kami menjangkakan Bank Negara akan mengekalkan OPR pada 1.75% dalam mesyuarat

Prospek Pelaburan (Sambungan)

dasar yang akan datang pada 8 Julai, dan untuk terus mengambil langkah-langkah fiskal dan rangsangan, seperti program PEMULIH RM150bn yang dilancarkan baru-baru ini. Bank pusat mungkin berkongsi ramalan pertumbuhan KDNK 2021 terkini (sebelum ini pada 6.0-7.5%) dalam mesyuarat yang akan datang. Tinjauan Bloomberg pada bulan Jun belum dikeluarkan (tinjauan pendapat Mei adalah 5.7%), tetapi ramalan baru-baru ini mempunyai julat yang luas antara 2.5%-6.3%.

Pada suku ketiga 2021, Markit juga menunjukkan bahawa pengeluar semakin yakin bahawa pengeluaran akan meningkat pada tahun yang akan datang, dengan harapan bahawa berakhirnya wabak ini akan mendorong projek baharu dimulakan dan membantu pemulihan permintaan pasaran secara meluas. Markit juga mengatakan bahawa tahap optimisme telah mencapai tahap tertinggi sejak April. Bank Negara mengekalkan OPR pada 1.75% semasa mesyuarat MPC pada 9 September. Lonjakan inflasi baru-baru ini dilihat sebagai sementara dan diunjurkan sebagai sederhana, dengan inflasi teras berkisar antara 0.5% hingga 1.5% untuk 2021.

Pada suku keempat 2021, PMI pembuatan Malaysia bertambah baik daripada 52.3 mata pada November kepada 52.8 mata pada Disember, bulan ketiga berturut-turut yang mengalami pertumbuhan dalam aktiviti kilang dan yang paling kukuh sejak April. Pengeluaran dan jumlah pesanan baharu meningkat lantaran penarikan balik sekatan pergerakan dan pemulihan permintaan. Jualan eksport baharu juga meningkat lantaran permintaan yang lebih kukuh dari AS dan China. Walaupun tekanan meningkat pada barisan pengeluaran, pengeluar masih mengurangkan tenaga kerja. Mengenai OPR, kami menjangkakan Bank Negara akan meningkat 25bps masing-masing pada 2022 dan 2023 daripada OPR semasa 1.75% tetapi ahli ekonomi menjadi lebih agresif berikutan tekanan inflasi yang berterusan. Daripada semakan perolehan selepas keputusan suku ketiga 2021, kami mengunjurkan penurunan perolehan sebanyak 5% bagi FBM KLCI untuk 2022 tetapi pertumbuhan 10% tidak termasuk sektor Sektor Sarung Tangan. Bank, Permainan dan Pengangkutan menyumbang 75% daripada pertumbuhan melainkan Sektor Sarung Tangan untuk 2022.

Pada suku pertama 2022, pengeluar Malaysia melaporkan keadaan operasi yang hampir tidak berkembang. PMI pembuatan utama jatuh daripada 50.9 mata pada Februari kepada 49.6 mata – kali terakhir bacaan adalah di bawah 50 pada Sept 2021. Pesanan dan pengeluaran baharu adalah sederhana untuk bulan ketiga yang beroperasi dan pada kadar yang lebih pantas. Firma mengaitkan keadaan permintaan yang lemah dengan peningkatan kes Covid-19 dan harga input

yang lebih tinggi, dengan kapasiti pembuatan dikekang oleh kekurangan bekalan, malah baru-baru ini diburukkan lagi oleh perang Rusia-Ukraine. Kos input yang lebih tinggi juga telah mendorong perniagaan untuk menaikkan caj output pada kadar paling tajam sejak April 2021.

Bank Negara mengurangkan unjuran pertumbuhan KDNK kepada 5.3-6.3% untuk 2022, daripada 5.5-6.5% sebelum ini. Walaupun sempadan dan perniagaan dibuka semula berikutan penarikan balik sekatan Covid-19, bank pusat menjangkakan beberapa impak daripada konflik Rusia-Ukraine. Inflasi utama juga diunjurkan dengan purata lebih tinggi antara 2.2% hingga 3.2% (berbanding 2.1% sebelum ini). Ia mengekalkan OPR pada 1.75% dalam mesyuarat MPC baru-baru ini, tetapi kami menjangkakan kenaikan 25bps pada separuh kedua 2022, dan 25bps pada 2023. Pengetatan monetari akan bergantung kepada cetakan inflasi, yang kini menjadi hangat berikutan kenaikan harga komoditi dan isu rantaian bekalan yang berterusan.

~ oleh CIMB-Principal Asset Management Berhad

Dana AmlIslamic Growth

Pasaran ekuiti tidak menentu lantaran keimbangan tentang tekanan inflasi yang berterusan dan pengetatan dasar bank pusat. Ketidakpastian yang semakin meningkat terhadap impak ekonomi apabila harga tenaga dan komoditi terus meningkat juga menambahkan ketidakstabilan pasaran. Walau bagaimanapun, kami optimis terhadap pasaran ekuiti berikutan pembukaan semula ekonomi di tengah-tengah situasi endemik Covid-19, bersama-sama dengan dasar fiskal akomodatif untuk mengekalkan pertumbuhan ekonomi yang sederhana. Di samping itu, pasaran ekuiti tempatan akan mendapat manfaat daripada kenaikan harga komoditi dan penilaianya yang menarik berbanding pasaran setara.

Strategi Pelaburan

LAPORAN TAHUNAN
2022

Dana Berkaitan Pelaburan
Bagi Tahun Kewangan Berakhir 31 Mac 2022

Strategi Pelaburan

Dana AmMetLife Takaful Equity, Balanced, Sukuk dan Balanced Plus

Strategi Pelaburan Ekuiti

Memandangkan ketidaktentuan, portfolio yang seimbang dijamin terdiri daripada campuran saham yang menghasilkan dividen yang baik untuk menyediakan aliran pendapatan yang stabil dan kedudukan dalam saham nilai serta penerima manfaat pemulihan.

Strategi Pelaburan Dana Sukuk

Tempoh

Kami mengekalkan tempoh portfolio pada kadar neutral kepada sedikit wajaran berlebihan ukur rujuk berikutan penjualan baru-baru ini. Hasil berada pada tahap yang menarik dan kami percaya bahawa penimbal kenaikan kadar yang mencukupi telah ditetapkan.

Pemilihan Kredit

Bon korporat yang wajaran berlebihan ukur rujuk adalah pada sebaran yang masih menarik dan kadar turun naik yang lebih rendah semasa kami menavigasi melalui tempoh yang tidak stabil dengan Rizab Persekutuan AS menetapkan pengetatan dasar yang lebih agresif.

~oleh AmFunds Management Berhad

Strategi Pelaburan Dana AmMetLife Takaful Balanced Plus

Dana Al-Ilham

Dana ini membina dan mengekalkan pendedahan yang tinggi dalam sektor teknologi sebelum mengurangkannya menjelang akhir tempoh tinjauan. Kami kekal melabur wajaran berlebihan dalam sektor ini kerana kami positif terhadap trend struktur jangka panjang dalam industri teknologi. Dalam tempoh tinjauan yang sama, Dana ini juga meningkatkan pendedahan dalam saham-saham bahan terpilih untuk mengeksplorasi pemulihan harga komoditi sementara kekal melabur wajaran berlebihan dalam sektor pemulihan kitaran iaitu sektor budi bicara pengguna, hartanah dan kewangan, untuk memacu tema pembukaan semula ekonomi.

~oleh Eastspring Investments Berhad

Dana Principal DALI Equity Growth

Pada suku pertama 2021, kami kekal Neutral di Malaysia dan kekal menyokong tema pembukaan semula dan dengan itu membina sektor seperti Kitaran, Komoditi dan Pengangkutan terpilih. Bagi teknologi, ia telah mengatasi prestasi dengan ketara, oleh itu, kami sangat selektif dan memberi tumpuan kepada nama teknologi yang berkualiti sambil tetap berhati-hati terhadap syarikat yang bernilai tinggi.

Kami berhati-hati dengan Sektor Sarung Tangan kerana pendapatan nampaknya telah memuncak walaupun isu ESG semakin berkurangan.

Pada suku kedua 2021, kami kekal berhati-hati di Malaysia, memandangkan kawalan pergerakan yang berpanjangan dan kekurangan pemangkin penarafan semula yang jelas. Hasilnya, kami telah menurunkan beta portfolio kami baru-baru ini. Kami selektif terhadap saham dari bawah ke atas yang memainkan tema pembukaan semula dan dengan itu kekal membina sektor seperti Kitaran iaitu Budi Bicara Pengguna dan Pengangkutan terpilih.

Kami berubah positif terhadap Teknologi, berikutan penarikan balik baru-baru ini, dan mengekalkan pendirian wajaran rendah kami terhadap Sektor Sarung Tangan dan Perladangan.

Pada suku ketiga 2021, kami kekal positif terhadap Malaysia apabila kawalan pergerakan diper mudahkan, membuka jalan untuk pembukaan semula ekonomi sepenuhnya, dan isu politik domestik semakin berkurangan. Kami tetap selektif terhadap saham dari bawah ke atas yang memainkan tema pembukaan semula dan dengan itu kekal membina sektor seperti Budi Bicara Pengguna dan Pengangkutan terpilih.

Sektor-sektor yang mendapat manfaat daripada pembaharuan kerajaan tertentu seperti penyedia sistem, dan fiskal pump-priming untuk memulihkan ekonomi seperti Pembinaan dan Bahan Binaan, boleh menjadi tumpuan seterusnya.

Kami terus melabur wajaran berlebihan dalam syarikat Teknologi terpilih dan melabur wajaran rendah dalam Sektor Sarung Tangan memandangkan prospek pendapatan mereka dan isu ESG. Walaupun kami bersikap neutral terhadap Perladangan kerana syarikat-syarikat utama berusaha untuk menangani kebimbangan ESG dan penilaian telah mengambil kira kebimbangan tersebut.

Pada suku keempat 2021, sentimen Pelabur kekal terjejas oleh pembayaran Cukai Kemakmuran sekali sahaja dengan kesan meluas yang menjelaskan pendapatan korporat pada tahun 2022 dan ketakutan terhadap Omicron walaupun kes Omicron semakin berkurangan. Oleh itu, kami menggunakan pendekatan yang seimbang dengan kepelbagaiannya yang mencukupi, membuka semula permainan dan sektor dengan kisah pertumbuhan struktur atau sekular. Sektor pertama termasuk sektor nilai seperti Aluminium dan Tenaga yang mempunyai potensi peningkatan perolehan.

Kami tetap teguh dalam strategi kami untuk Tema kitaran yang Wajaran berlebihan seperti Budi Bicara Pengguna, Tenaga, Bahan Asas, dan Teknologi terpilih walaupun kami mengurangkan pelaburan yang Wajaran berlebihan.

Strategi Pelaburan (Sambungan)

Pada suku pertama 2022, kami terus menggunakan pendekatan yang seimbang, dengan kecondongan yang lebih besar kepada nilai berbanding pertumbuhan, dan mengekalkan kepelbagaiannya yang mencukupi. Kami kekal melabur wajaran berlebihan dalam tema kitaran seperti Budi Bicara Pengguna, serta Komoditi, kami telah bertukar neutral terhadap kewangan selepas prestasi kukuh Tahun Berakhir (YTD).

Kami terus mengurangkan teknologi mahal sambil kekal melabur dalam nama teknologi bernilai yang baik dengan pertumbuhan berstruktur.

Dana Principal Islamic Lifetime Sukuk

Pada suku pertama 2021, kami melihat penilaian Sekuriti Kerajaan Malaysia di hujung panjang keluk kelihatan menarik. Walau bagaimanapun, kami tetap berhati-hati bahawa ketidakpastian kekal wujud dan harus mengambil peluang untuk menjual pada masa kenaikan. Kami mengamalkan strategi barbell untuk memaksimumkan potensi pulangan sambil mengehadkan risiko. Kami melabur wajaran berlebihan dalam sektor korporat untuk meraih hasil yang lebih baik. Kami mengambil keuntungan dengan melabur dalam saham yang mencapai sasaran harga kami dan berpindah ke kredit baharu.

Pada suku kedua 2021, kami kekalkan keutamaan kami dalam penerbit dengan metrik kredit yang lebih kukuh dan lebih berdaya tahan yang boleh bertahan dalam persekitaran yang tidak menentu.

Pada suku ketiga 2021, kami melihat peningkatan dalam sentimen pasaran bon tempatan berikutan pelantikan PM baharu kami dan pengumuman kabinet baharu. Selain itu, kecairan domestik yang mencukupi dilihat berikutan kematangan yang dilihat untuk tempoh tersebut. Kami kekal melabur wajaran berlebihan dalam bon korporat untuk meraih hasil dan jumlah keseluruhan pulangan yang lebih baik, dan kami terus mempunyai keutamaan dalam nama yang lebih berdaya tahan dengan asas yang lebih kukuh, serta kecairan yang lebih baik.

Pada suku keempat 2021, kami mengekalkan keutamaan kami dalam segmen kredit dengan tumpuan pada terbitan utama yang menawarkan pengambilan hasil yang lebih baik. Kami berhati-hati terhadap potensi penentuan harga semula keluk kerana sebaran kredit adalah ketat dan di bawah purata jangka panjang. Untuk Sekuriti Kerajaan Malaysia, kami mengambil keuntungan pada hujung keluk yang lebih panjang untuk mengurangkan risiko tempoh dan beralih daripada bon penanda aras sedia ada yang akan digantikan pada tahun 2022. Kami terus memantau pasaran pada harga masuk yang baik apabila wujudnya nilai.

Pada suku pertama 2022, penjualan baru-baru ini dalam hasil MGS / GII telah mengakibatkan Sekuriti Kerajaan Malaysia kelihatan lebih menarik dengan 3-4 kenaikan harga pada beberapa bahagian keluk pada masa akan datang. Sekuriti Kerajaan Malaysia kelihatan menarik sekarang berikutan penjualan dan mungkin mewujudkan beberapa peluang perdagangan. Walau bagaimanapun, kami memberi amaran bahawa Sekuriti Kerajaan Malaysia akan terus tidak menentu memandangkan trend yang meningkat dalam hasil bon global dan bekalan yang banyak pada suku ini di dalam negara. Kami meneruskan keutamaan kami dalam segmen kredit untuk pengambilan hasil yang lebih baik. Kami menjangkakan akan ada lebih banyak bekalan bon korporat utama sebelum hasil bergerak lebih tinggi dan menyerlahkan potensi risiko penetapan harga semula. Kami akan mengambil keuntungan dan beralih kepada kredit utama baharu untuk mengurangkan turun naik jangka terdekat. Kami kekal neutral kerana tajuk berita luaran dijangka akan terus melemahkan sentimen dalam pasaran bon domestik.

~oleh CIMB-Principal Asset Management Berhad

Dana AmlIslamic Growth

Memandangkan ketidaktentuan pasaran, portfolio yang seimbang dijamin terdiri daripada campuran saham yang menghasilkan dividen yang baik untuk menyediakan aliran pendapatan yang stabil dan kedudukan dalam saham nilai serta penerima manfaat pemulihan.
